This amendment is raised to answer questions from industry and modify solicitation 5P435-175035/A to add a requirement for a 3<sup>rd</sup> Skid Steer Loader as follows:

Q1: Line item 5.1 (a) of the Compliance Matrix - I don't understand what they require for "Hydraulic Pallet Forks" - please provide more information.

A1: We require hydraulics that can adjust the fork width from inside the cab; and for left / right sliding of the pallet forks frame for positioning of pallets.

Q2: Line item 5.1 (b) of the Compliance Matrix - Profile General Purpose Smooth Edge Bucket- we need to know the size of bucket required, width and capacity, and if you would like replaceable bolt on cutting edge or welded on edge.

A2: The width of the General Purpose Smooth Edge Bucket must be a minimum of 59" to a maximum of 62". The capacity of the bucket will be determined by the width size offered. General Purpose Smooth Edge Bucket must have a replaceable bolt on the cutting edge.

Q3: Line item 5.1 (c) of Compliance Matrix - Snow/Light Material Smooth Edge Bucket - we again need to know the size of bucket, the required-width and capacity, and if you would like replaceable bolt on cutting edge or welded on edge.

A3: The width of the Snow/Light Material Smooth Edge Bucket must be a minimum of 65" to a maximum of 68". The capacity of the bucket will be determined by the width size offered. Snow/Light Material Smooth Edge Bucket must have a replaceable bolt on smooth edge.
