Amendment 04

This amendment is being raised to distribute answers to bidder questions.

A) QUESTIONS AND ANSWERS

Q10 During the site meeting there was a comment made regarding the backfill of the multi plate culvert being import material if that was what was required by the culvert supplier.

a. There is no pay item for import backfill under Section A.

i. If import material is required at the multi plate culvert, will we be paid under item 15 in Section B?

A10 Engineered backfill is required as per Canada Culvert recommendations. Backfill material shall consist of a well graded granular material with angular grains classifying as "Bridge End Fill" in section 202 of the BC MOT Standard Specifications for Highway Construction, and should have a minimum 30% gravel content. Engineered backfill zone should extend 1/2 the span on each side of the structure.

Engineered backfill is to be included as part of line item #7 - Corrugated steel Multi-plate culvert.

Q11 Is there a warranty for growth of live staking? If so, how long?

A11 Warranty period for all works will be 12 months as per the General Conditions.

All other terms and conditions remain unchanged.
