Amendment 005

Amendment 005 has been raised to include questions and answers, an updated **APPENDIX 1 – COMBINED PRICE FORM (REVISION 1 – JANUARY 05, 2017)**, extension to closing date and to incorporate Addendum 003.

Previously issued **APPENDIX 1- COMBINED PRICE FORM** now replaced with **APPENDIX 1 – COMBINED PRICE FORM (REVISION 1 – JANUARY 05, 2017)**.

The revised **APPENDIX 1 – COMBINED PRICE FORM (REVISION 1 – JANUARY 05, 2017)** must be used when submitting your bid. Any bid submitted on a previous version of the Bid and Acceptance Form will be considered non-compliant and therefore disqualified.

Extension to the closing date of this solicitation.

Extension of Time for Tenderers

Esquimalt Fill Site Eastern Remediation, Esquimalt Harbour, B.C

Solicitation No: EZ897-172420/A

Notice is hereby given that the time for reception of tenders previously due at 2:00 p.m. PST on January 10, 2017 is hereby extended to **2:00 p.m. PST on January 12, 2017**.

Addendum 003

- R.077399.003 – Esquimalt Fill Site Eastern Remediation - Drawing 4 attached
- From the Specifications:
Replace 312333.01-3.6.3 with:
Excavate all Contaminated Material laterally and vertically to the uplands Property Line. Excavate all Contaminated Material laterally at surface to the marine or foreshore Property Line (approximately the High Water Mark) and to depth sloping inland at approximately 1 horizontal to 1 vertical. Leave a berm of insitu soil between the excavation and the ocean. Do not excavate below the High Water Mark on the foreshore.

All other terms and conditions remain unchanged.

APPENDIX 1 - COMBINED PRICE FORM (REVISION 1 – JANUARY 05, 2017)

- 1) The prices per unit shall govern in establishing the Total Extended Amount. Any arithmetical errors in this Appendix will be corrected by Canada.
- 2) Canada may reject the bid if any of the prices submitted do not reasonably reflect the cost of performing the part of the work to which that price applies.

UNIT PRICE TABLE

The Unit Price Table designates Work to which a Unit Price Arrangement applies.

- (a) Work included in each item is as described in the referenced specification section.
- (b) The Price per Unit shall not include any amounts for Work that is not included in that unit price Item.

	Class of Labour, Plant or Material	Unit of Measure-ment	Estimated Quantity (EQ)	Price per Unit applicable taxes extra (PU)	Extended amount (EQ x PU) applicable taxes extra
1.	Pre-Mobilization Submittals	Lump Sum	1		
2.	Mobilization	Lump Sum	1		
3.	Site Preparation	Lump Sum	1		
4.	Site Facilities - Provision	Lump Sum	1		
5.	Site Facilities - Operation	Lump Sum	1		
6.	Standby Time	Day	5		
7.	Contaminated Water Treatment - Provision	Lump Sum	1		
8.	Contaminated Water Treatment - Operation	Lump Sum	1		
9.	Temporary Sloping and Shoring	Lump Sum	1		
10.	Waste Oversize Debris Removal	Hour	10		
11.	Excavation	Cubic Meters	11,050		
12.	Backfill – Imported	Cubic Meters	11,050		
13.	Transport - Contaminated Material: Hazardous Waste	Tonnes	500		
14.	Transport - Contaminated Material: Waste Quality	Tonnes	21,500		
15.	Transport - Non-Contaminated Material and Waste	Tonnes	100		
16.	Disposal - Contaminated Material: Hazardous Waste	Tonnes	500		
17.	Disposal - Contaminated Material: Waste Quality	Tonnes	21,500		
18.	Disposal - Non-Contaminated Material and Waste	Tonnes	100

Response to Questions:

Question 1: In Appendix B Geotechnical Foreshore Investigation 5.0 Comments – it states “The assessment and description of potential marine barrier options will be provided in a subsequent technical memorandum.” Can you confirm if this memorandum will be issued to us ?

Answer 1: As this solicitation is a design-build this technical memorandum was not completed.

Question 2: Placement of shoring: Excavation to happen to property line. Does this mean that the contractor has permission to place shoring just outside of property line, and excavate right to the property line? Or is the contractor to place shoring flush to the inside of property line and excavate to the shoring?

Answer 2: Shoring may be placed outside the excavation limits on adjacent property where that adjacent property is owned by Transport Canada. If the adjacent property is not owned by Transport Canada then any shoring must be placed on the property line.

Question 3: Upland Discharge: What is required to obtain Transport Canada's permission to discharge water to the upland sump? Permits? Standards/ guidelines?

Answer 3: For onsite discharge to the uplands Transport Canada property, no permits are required; however, discharge cannot impact Transport Canada property (eg erosion, silt), and would need to meet the more stringent of BC CSR and CCME groundwater standards.

Question 4: Stockpiling: Remediation soil storage/ stockpiling not permitted on Esquimalt FN Lands. Does TC have permission from Esquimalt FN to stockpile in the staging areas?

Answer 4: Yes, but the Contractor is responsible for ensuring stockpiling does not impact the underlying soil or water.

Question 5: Transfer/Interim Storage Facility: Definition does not require a permit for the facility. Confirm this is acceptable.

Answer 5: Onsite storage facilities do not require a permit. Offsite storage facilities are the responsibility of the Contractor.

Question 6: 01 11 00 requires mobilization within 10 days of award: Most critical submittals are required by then, but allow 10 working days for review... so what can we do upon mobilizing and awaiting review of key plans and procedures?

Answer 6: Mobilization cannot occur until critical submittals are reviewed. If the Submittals are complete review can be performed in 2 days.

Question 7: 01 41 00 1.3.1 then requires all approvals, permits, etc to be submitted at or prior to contract award (at least 10 days prior to mobilization). Please clarify what submittal are anticipated under this section.

Answer 7: It is the responsibility of the Contractor to determine and obtain all required approvals or permits.

Question 8: 01 52 00 clause 1.16.1 requires water for contaminated truck wash. Please confirm the water source to be used and what service is to be installed.

Answer 8: As per 011100-1.6.4.2, water is not available on Site. The Contractor is responsible for supplying water.

Question 9: Is all contamination to be removed along all Limits of Eastern Upland Remediation on Drawing 4?

Answer 9: No. Excavation of all contamination is required along the uplands remediation limits, as shown in the red dashed line on the Amended Drawing 4. Excavation of all contamination is not required along the marine/foreshore remediation limits, as shown in the black dashed line on the Amended Drawing 4. For the marine/foreshore remediation limits, excavation will start at the Property Line (which is approximately the High Water Mark) at surface, and slope at approximately 1:1 (depending on soil and tide conditions) inland from the Property Line. Thus there will be a wedge of contaminated fill remaining only along the marine/foreshore remediation limits.
