Amendment #004 – Question received for Nitrogen Generator for CFB Trenton Tire Shop

Question:

1. It has been stated the volume requirement to fill the aircraft tire is 21.5 - 30 Liters. Does this mean 21.5 – 30 Liters is the displacement volume of the tire at atmospheric pressure or is that the flow of nitrogen required to fill the tire to the required pressure of 300 psig??

Answer: 21.5 to 30 liters is the volume required to fill the tire to the required pressure.

2. Question

With reference to Annex A 8. b) Must be able to perform its duty in estimated_ranges_are_0_–_60_deg_C_

Would 0- 45 degrees be acceptable due to the fact that it does not get that hot in CFB Trenton?

Answer:

It might not get that hot in Trenton but the generator will be installed in an enclosed room were the temp from the running generator and air compressor could very likely exceed 60 deg's celcius.

3. With reference to the below request will one letter with both statements be acceptable?

4.1.1 Technical Evaluation

4.1.1.1 Mandatory Technical Criteria

2. The Bidder must provide a letter from the manufacturer(s) stating the Bidder has been authorized to sell and service the proposed equipment in Canada for a minimum of one year.

3. The Bidder must provide a letter from the manufacturer(s) stating that all parts for the proposed equipment will be stocked in Canada at minimum March 31, 2020.

Yes if one letter provide proof to both questions this is acceptable.
