Cette modification de l'invitation numéro 1 est soumise et comprend la modification numéro 1 suivante.

La modification qui suit apportée aux documents de soumission entre en vigueur dès maintenant.
L'addenda fera partie des documents de contrat.

Toutes autres conditions ne changent pas.

Modification numéro 1

QUESTIONS ET RÉPONSES

Q1. On the drawing 201 Detail 1 it is calling for a Non-Woven geotextile, however I don't see any specifications on this. Can you please advise what properties are required for the geotextile?

R1. Non-woven geotextile properties should be at a minimum as follows:

Grab Tensile strength: 756 N
UV Resistance: 70% @ 500 hrs.
Apparent Opening Size: 0.212 mm

Q2. I have looked thru everything and for some reason I cannot find the electric power for the motors, 120 or 240 volt? Single or 3 phase?

R2. The electric power of the motor should be 240 V single phase.

Q3. Reference: 2.3 Store Tank System Piping

- 1. Stainless Steel Pipe:**
 - .1 Stainless steel: 304 or 316 series**
 - .2 50 mm and smaller: Schedule 80**
- Seamless to ASTM A312/A312M-04B.**

Also here is another question, note the piping schedule; is this also the requirement for the cabinet piping? This will add more cost, not sure how much but from material and welding it might be significant.

R3. All piping is required to be stainless steel.

Q4. Will product in existing tank be disposed of and assume it to be full?

R4. This project will be completed in two phases. The existing storage tank will remain in-service until the new system is operational. Prior to removal, all usable fuel will be filtered and transferred to the new storage tank.

Q5. Reference Drawing 204, Detail 3: The product specified is Sikaflex 1C SL. Would MasterSeal CR 125 be acceptable?

R5. MasterSeal CR 125 would be an acceptable substitute.
