To revise and clarify answer to Amendment 001 question 2

Question 2 - Can the control be surface mounted with built in High pressure power units? More Durable and better for maintenance and troubleshooting.

Original Answer 2 - NO . The hydraulic control valve will be of composite design providing individual control of front and rear posts as well as operation in the synchronised mode. The valve will be located in a suitable remote control box which shall be mounted in a convenient location.

Revised Answer 2 - There was misunderstanding over whether the question was aimed at where the controls were to be mounted, if a high pressure unit was allowable or what operational constraints existed for the controls. The revised answer is, yes the control can be surface mounted with built in High pressure power units as long as the controls provide individual control of front and rear posts as well as operation in the synchronised mode. Only the lifting unit (hoist) must be in ground. Pump, hydraulics and other things may be above ground or partially in ground.

6.4 Term of Contract

6.4.1 Delivery Date

Delete:

All the deliverables must be received on or before March 31, 2017.

Insert:

Best Delivery Date – Bid

While delivery is requested by 31 May 2017, the best delivery that could be offered is _____

.
