

Statement of Work

Project: Mactaquac FRP Grating System Left & Right Wings

Location: Mactaquac Biodiversity Facility, 114 Fish Hatchery Lane, Kingsclear, NB, E3E 2C6

Statement of Work

This project is to replace the existing steel grates with new Fiberglass Reinforced Plastic (FRP) grates in the left and right wings in the Mactaquac Biodiversity Facility.

- a. The existing steel grates are to be removed without damaging the existing structure
- b. The existing grates are to be disposed
- c. The new FRP grates are to be installed at the same locations
- d. Transitional sections are to be used where applicable
- e. Continuous FRP sections are to span the full width of each walkway

Additional Requirement of the Project

- a. The construction schedule shall not interrupt the Science Program on site.
- b. The contractor will demonstrate to the project engineer during the final inspection that the contract documents are followed.
- c. The contractor is to provide price to supply and install all labour, materials, permits, etc... for this project.
- d. The contractor will include the information about the warranty (period and items to be covered)
- e. The contractor will provide the as-built drawings in one-week following the project substantial completion inspection.

Work Schedule

- a. Project completion by March 31, 2017.
- b. Notifying the project engineer once the work is completed, the project engineer will coordinate final inspection
- c. Provide at least 48 hours advanced notice to the project engineer before coming to the site for the first time to start the work

Other Requirements

- Proof of Liability Insurance
- Letter of Good Standing with WorkSafe NB or equivalent
