### **1.2 Summary**

Fisheries and Oceans Canada (DFO) has a requirement to conduct Salmon Patrol Services on the Pacific north coast of British Columbia. The contractor must have the ability to assess salmon stocks, report on fishing activities, collect and provide catch statistics, conduct stream inventories, and collect biological samples. In addition, it must possess the tools and equipment to conduct the work.

The intent is to establish a standing offer for each patrol area so that the contractor can be called up to provide services on an as and when required basis. The inclusion of estimated days per year in the cost proposal document is not a commitment by DFO. It is anticipated that resource managers will endeavour to be in contact with contractors to discuss an upcoming season and what possible level of effort may be considered so that contractors can plan their business accordingly. These discussions are not a commitment or guarantee by DFO to call up or contract for these estimates.

Standing offers are not a guarantee of business and Fisheries and Oceans Canada is not obligated to use these services. A Standing Offer will be for four (4) years at the discretion of Fisheries and Oceans Canada.

The requirement is subject to the provisions of the Agreement on Internal Trade (AIT). The requirement is subject to a preference for Canadian goods and/or service.

### **1.3 Security Requirements**

There are no security requirements for this project.

### **1.4 Debriefings**

Offerors may request a debriefing on the results of the request for standing offers process. Offerors should make the request to the Standing Offer Authority within 15 working days of receipt of the results of the request for standing offers process. The debriefing may be in writing, by telephone or in person.

## **PART 2 - OFFEROR INSTRUCTIONS**

Care should be taken by Offerors to explain each question in sufficient detail in order to enable Canada to provide an accurate answer. Technical enquiries that are of a proprietary nature must be

clearly marked "proprietary" at each relevant item. Items identified as "proprietary" will be treated as such except where Canada determines that the enquiry is not of a proprietary nature. Canada may edit the question(s) or may request that Offerors do so, so that the proprietary nature of the question(s) is eliminated, and the enquiry can be answered to all Offerors. Enquiries not submitted in a form that can be distributed to all Offerors may not be answered by Canada.

## ANNEX "A" STATEMENT OF WORK

### Title

#### **Salmon Patrol Services –Central Coast**

### Introduction

Fisheries and Oceans Canada (DFO) has a requirement to conduct Salmon Patrol Services on the Pacific north coast of British Columbia. The contractor must have the ability to assess salmon stocks, report on fishing activities, collect and provide catch statistics, conduct stream inventories, and collect biological samples. In addition, it must possess the tools and equipment to conduct the work.

The intent is to establish a standing offer for each patrol area so that the contractor can be called up to provide services on an as and when required basis. The inclusion of estimated days per year in the cost proposal document is not a commitment by DFO. It is anticipated that resource managers will endeavour to be in contact with contractors to discuss an upcoming season and what possible level of effort may be considered so that contractors can plan their business accordingly. These discussions are not a commitment or guarantee by DFO to call up or contract for these estimates.

**Standing offers are not a guarantee of business and Fisheries and Oceans Canada is not obligated to use these services.**

**Cost Evaluation (total maximum of 30 points) – please use Cost Proposal form provided**

Of those proposals determined to be technically responsive, the lowest cost proposal will be awarded the maximum number of points assigned for cost (30 points). The points for cost for the remaining technically responsive proposals will be allocated on a pro-rata basis.

The per diem (daily) rate is to include all costs except fuel.

**BASIS OF SELECTION:**

For each charter area, compliant bidders will be ranked from highest combined points to lowest combined points. The bidder with the highest combined points shall be selected and awarded a standing offer.

If a bidder scores highest in more than one charter area they will be given the option to choose a charter area. The charter area not selected will then be offered to the bidder scoring the second highest combined points in that area.

While it is the intention of the department to have one standing offer for each charter area, those accepting standing offers understand they may be asked to provide services in alternate charter areas to be determined by the resource managers as needed and described in Statement of Work.

**Standing offers are not a guarantee of business and Fisheries and Oceans Canada is not obligated to use these services.**

Possible Additional Services

Bidders who are not awarded a Standing Offer but were determined to be technically responsive will be kept on a qualified list of interested service providers. If opportunities develop where the department needs additional patrol services, that cannot be met by the respective charter area standing offer holders, bidders on the qualified list will be asked if they are interested and to submit a price quote. Interested bidders may need to demonstrate that they have maintained their mandatory requirements. The list will be used until April 30<sup>th</sup>, 2021.
