**Title: Non-Intrusive Signal Analyzer**  
**Solicitation Number: M2989-6-0368**  
**Solicitation Amendment: 001**

**The solicitation amendment 001 is raised to answer bidders' questions:**

**Q1) Is there a specific manufacturer not defined in the RFQ that the RCMP is considering?**

A1) There is no specific manufacturer

**Q2) Does the device need to be self-contained or a stand alone unit?**

A2) By "self contained" RCMP means it should be transportable to a remote location and be able to perform its task without any external dependencies (ie. network connection to a core server).

**Q3) Our offering would require a separate PC or tablet with USB 3.0 to operate. If this is an option, would the RCMP want us to quote a tablet or PC?**

A3) As per section 2.3 of the Statement of Requirement, the "system must include all components necessary for controlling the device and viewing/changing its configuration and results". For any of the options (PC, tablet) you offer you should consider form factor implications on section 2.1 (Physical) of the Statement of Requirement.

All other Terms and Conditions Remain Unchanged.
