DESCRIPTION OF THE REQUIREMENT:

Currently the WTSD Directorate has a requirement for Programmer Analysts (level 3) on an “as and when required basis” to address the demand for application scripting and deployment packaging services as well as address the increase in workload resulting from the initiative to replace several desktop software components. Duties and tasks may not be limited to the following:

- Develop .NET programs using MS Visual Studio for the automated delivery and installation of corporate desktop software productivity tools and utilities; and corporate and line of business application desktop components adhering to Innovation, Science and Economic Development scripting and packaging standards and processes. Note that, each application program developed may require an “installation”, “repair”, and “uninstall” capability.
- Analyze, develop, test, document and implement technical configurations for the corporate desktop software tools. Technical configuration documentation may include minimum configuration recommendations (both software and hardware), description of configuration item and technical configuration details such as default settings, alternative settings, recommended settings as well as justification for recommended setting.
- Liaise and work with IT Security to review and finalize security related product configurations, as required.
- Work with application developers and technical owners to gather requirements, to discuss solutions, to make recommendations, to test/validate and to confirm that requirements have been met.
- Prepare rollout strategies for software components, addressing both migration and ongoing operations (strategies for various components must be aligned and integrated).
- Produce software “Prototype Packages” including Technical Installation Guides, Software Prototypes, Installation Strategies and Rollout Prerequisites.
- Develop Quality Assurance Test Plans / Scripts to validate that engineering meets user requirements and technical configuration standards. Conduct engineering testing, and produce engineering test reports.
- Where applicable, design, document and test Rollback processes and software.
- Produce final “Production Packages”, including Technical Installation Guides & Software Packages (installation and deployment). All instructions must be tested and validated.
- Prepare technical support documentation, including Knowledge base material and technical FAQ’s for the Service Desk and Desktop Support technicians.
- Contribute to software product technical and end user communiques.
- Provide subject matter expertise to stakeholders with regards to the ISED standard scripting tool (MS Visual Studio), standards and processes.
- Produce regular product status reports.
- Complete other related duties, as required.

PROPOSED PERIOD OF CONTRACT:

It is intended to result in the award of one contract for one (1) year, plus three (3) 1 year irrevocable option periods allowing Canada to extend the term of the contract(s).
