

QUESTION AND ANSWER NUMBER 1

SOLICITATION 5000019381

Canadian Air and Precipitation Monitoring Network Site Operator in Egbert, Ontario

1. From the statement of Work and task description, it is not clear:-
 - how often the Air System , Ozone, Total Gaseous Mercury (TGM) checks are required. The task descriptions on page 17 (paragraph 3. Air Sampling Collection), page 18 (paragraph 4. Ground Level Ozone), page 19 (paragraphs 5. Dichot & 7.TGM) notes requirement for daily checks and also weekly sampling. In Estimate time table on page 22 Air System, Ozone, Dichot and TGM are included only for weekly sampling requirement which does not include daily checks.
 - Please, confirm which instruments are required to be checked/serviced daily (precipitation excluded). Please include estimated time of daily check for each instrument (if required).

Daily checks have been removed with the exception of precipitation. Please refer to Amendment One for revisions.
