Title: Robotic Total Stations
Solicitation Number: M2989-6-0511
Solicitation Amendment: 001

The solicitation amendment 001 is raised to answer bidders' questions:

Q1) Further clarification on the spec is requested in regard to Specification **1.18**.
Would there be a better explanation or diagram of this feature?

A1) What it means is that if the prism is as close as 2 meters or less, a distance measurement will be recorded. Some total stations will not measure when the prism is that close.

Q2) In regard to Specification **3.18**, does the data collector have to have a full keypad as part of the hardware? Or will a full pop-up tablet keyboard meet this spec?

A2) The full keyboard is the requirement. RCMP has had the screen keyboard in the past and find it partially blocks the view of the points generated on the screen and there is more wear and tear on the screen itself.

Q3) Specification **1.32** states a "linear" range of 800M using a unique Bluetooth address. Is this spec accomplished onboard the data collector? Or can an external USB device be used to "boost communication" that plugs into the data collector to exceed range of 800 Meters

A3) The spec is to be accomplished onboard the data collector. An external USB device is not desirable as it is another piece of equipment that has to be maintained and stored.

All other Terms and Conditions Remain Unchanged.
