### **Amendment 003**

**This amendment is raised in order to answer bidder questions and to modify the SOW and the evaluation criteria as follows:**

**Question 3)** In section 3 Feather Banner Specifications, the description states "single reverse outdoor feather banner" and in section 7.5 it states "All banners must be printed in a way so that 90%-95% penetration is achieved" This is the case when a banner is printed single faced reversed (the front reads correctly, the back is the mirror image). However, the image that shows the artwork/design, it is shown to be double sided so that both sides of the banner read correctly. Penetration with this method would not be relevant. If you could confirm which layout is correct.

**Answer 3)** Please ignore the artwork layout. The correct answer is: Printed single faced reversed (the front reads correctly and the back is the mirror image).

**Question 4)** On the black and white image showing the hardware specs, it is stated that the sleeve is to be black, however on the page that shows the artwork/design the sleeve is shown as a printed image. Which would be the correct one?

**Answer 4)** The sleeve is to be black.

**Question 5)** Section 7.5 states "All banners must be digitally acid dye printed." Acid dye printing only pertains to nylon fabrics. When printed on polyester, as requested in section 3 it shows that the fabric is an "Exterior grade polyester" When screen printing on a polyester fabric, dispersed dyes are used - is this acceptable?

**Answer 5)** Yes, it is acceptable.

Correction: The banners don't need necessarily to be acid dye printed as we are going to print on polyester. We ask for full colour process, full bleed on fabric using UV-resistant inks.

**At Annex "A" Statement of Work, 7.5 Detailed specifications for fabrication and delivery.**

**DELETE:** All banners must be digitally acid dye printed according to the artwork supplied or silk screened, depending of the graphics, choice of colours and if the quantity of designs allow for this option to be more cost effective.

**INSERT:** All banners must be digitally printed according to the artwork supplied or silk screened, depending of the graphics, choice of colours and if the quantity of designs allow for this option to be more cost effective.

**At Annex "E" Evaluation Grid, AND Part 4 Evaluation Procedures and Basis of Selection, M.1 Experience of the Bidder,**

**DELETE:** M.1.2 When combined\*, each of the following requirements must have been included in the three (3) contracts:

- Banners fabricated using exterior grade polyester;
- Acid dye imprinting process;
- Silk screening process;
- Banners treated with a U.V. inhibitor after imprinting;
- Multi-coloured images (imprinting of a minimum of four [4] colours for any single design);
