

Vendors:

Questions are:

- 1) Power - please confirm if you would like base feed power or ceiling power. Please indicate the desired locations of the base feeds or ceiling power poles and the height the ceiling.

[See attached](#)

- 2) Panels - You have requested 60"wide panels with laminate elements. In previous SA bids using 60"wide laminate, bidders have been allowed to supply 2 x 30"wide panels for each 60"wide. Please confirm this is acceptable.

[No](#)

- 3) Accessories - Plastic in/out trays and paper sorters have been requested. Please advise if metal trays would also be acceptable?

[Yes](#)

- 4) Supporting Pedestals - please advise if the supporting pedestals are only to be used on the panel mounted worksurfaces. If some of them are to be used with freestanding surfaces, please revise the drawing to show the locations of each.

[Yes, they are only on the panel mounted surfaces](#)

- 5) Overhead storage - 54"wide wall mounted metal overhead storage with metal hinged doors is not listed on the SA. The widest size for this item on the SA is 48". Can you confirm 2 x 48"w or 3 x 36"w overheads is acceptable?

[3 x 36"](#)

- 6) 50"wide Surfaces - There are no 50"wide surfaces listed on the SA. In three (3) cases they are near a pillar. When this happens can we use a 48"wide surface instead. In other cases they are in a run of surfaces. When this happens, can we use a combination of sizes listed on the SA to meet the requirements?
