LA Pipeline	\$0.5857 CAD

For Reference Marker "NYHB", "USGC" or "LA PIPELINE", the average weekly assessment will be:

- converted from U.S. funds to Canadian funds using the day average of the Bank of Canada official exchange rate for the corresponding day; and
- converted from U.S. gallon to litres using 3.785412 as the conversion factor.

The Reference Marker price converted to Canadian dollars per litre will be rounded to four decimal places to the nearest hundredth of a cent per litre (\$0.0001/litre). Not considering any resultant value in the sixth decimal place, the fifth decimal place will be rounded as follows: less than or equal to \$0.00004 rounded down, \$0.00005-\$0.00009 rounded up.

Example calculation using the "NYHB" Marker:

(All prices indicated are for example purposes only)

Related NYHB marker price for week ending January 15, 2016 = U.S. \$0.5123/U.S.Gal.

Related NYHB marker price for week ending February 5, 2016 = U.S. \$0.5298/U.S. Gal.

Bank of Canada official U.S. exchange rate for day ending January 15, 2016 = \$1.3871 per U.S. dollar

Bank of Canada official U.S. exchange rate for day ending February 5, 2016 = \$1.4072 per U.S. Dollar

Litres in a US gallon = 3.785412

A) $(\$0.5123 \times \$1.3871) / 3.785412 = \$0.187723$ rounded to \$0.1877 Cdn per litre

B) $(\$0.5298 \times \$1.4072)/3.785412 = \$0.196949$ rounded to $\$0.1969$ Cdn per litre

C) B) minus A) = increase of $\$0.0092$ per litre

REVISION OF REFERENCE MARKER

In the event that:

A) the applicable Reference Marker is discontinued; or

B) Public Works and Government Services Canada determines that the Reference Marker does not reflect market conditions; the parties will mutually agree upon an appropriate and comparable substitute and the Contract will be modified to reflect such substitute on a mutually agreed upon date.
