---

The amendment 003 is raised to provide clarification to the document.

=====

**Question:** Is there any existing camera that we need to connect on this new system ?

**Response:** No, existing cameras will be removed and stored at the site.

=====

**Question:** Reference 'CCTV System Appendix' Section 3 – CCTV System Architecture Specifications. There is a reference about 'a cooling system in the server room dissipating approximatively 10,000 BTU'. Can you please provide more information about this requirement ? Should we plan to supply such unit ?

**Response:** No. Camera equipment in the server room will increase the amount of heat in the server room which will harm the servers. A cooling system must be supplied and installed by the vendor that is capable of dissipating approx. 10,000 BTU. This includes equipment, any necessary electrical work and labour.

=====

**Question:** Reference 'CCTV System Appendix' Section 5 – Cabling Recommendations. There are references about analog camera and coaxial wiring. We do not see any requirement for analog camera. Can you please clarify ?

**Response:** There are no requirements for analog cameras. The cabling specification is a one size fits all specification which would be equally applicable if a site had a requirement for a mix of IP and analog cameras. Therefore, in this case, the reference to analog cameras and coaxial cabling can be ignored. I doubt that it will come up but if it does we can address during the site visit.

=====

**Question:** Reference 'CCTV System Appendix' Section 14 – UPS Specifications. Can you please provide more information about the required power source for the specify UPS? Where are located the electrical panels? Wiring and electrical conduit to be supply by?

**Response:** There should be sufficient power in the server room to meet the requirements of the new system. If there is a requirement to supply additional power or circuits then the responsibility to do so will be to the vendor's electrical contractor. All required electrical equipment, conduit and associated labour is the responsibility of the vendor and their electrical contractor.

=====

All other terms and conditions remain unchanged.
