[1] In order to match WinFIS, the Floor Usable area in this report is the sum of rounded values for each Location on the floor. This may result in totals slightly different than those in the Stacking Diagram and "Floor Plan with Title Block" reports depending on the display mode used and, in some of the Room Summary reports.

[2] Accessory A on each floor is shared by the Locations on that floor.

[3] Accessory B is shared by all the Locations in the building.
