

# 2016 DRDC Innovation Call for Proposals

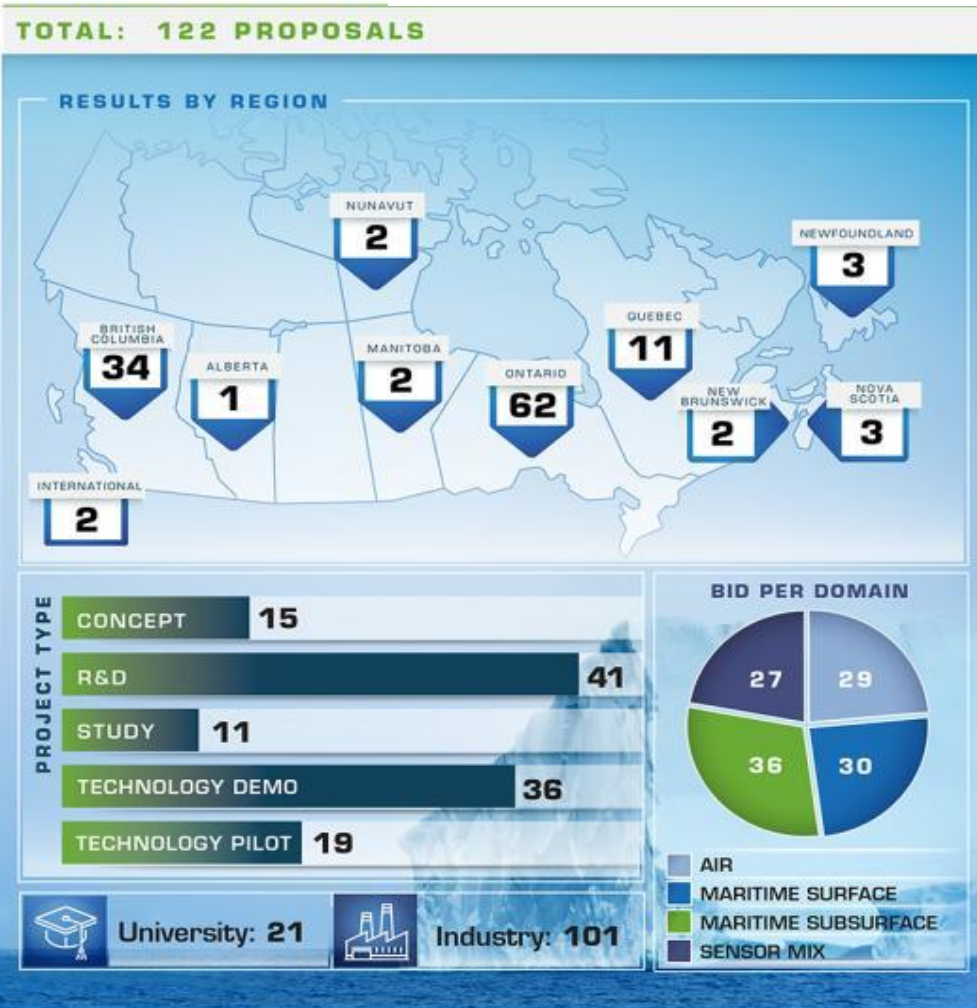

Dr. Pierre Lavoie

Director General Science and Technology Force Employment

CANSEC  
1 June 2017

# STREAM A All Domain Situational Awareness

- 122 proposals were received.
- 65 proposals pre-qualified by meeting the mandatory alignment criteria and the required minimum point-rated criteria scores.
- Bidders selected for contract negotiations have been informed.

# STREAM A All Domain Situational Awareness

## Stakeholder Engagement Process

- Letter of Interest and ADSA introduction (Apr 16)
- First Request for Information (RFI) and draft CfP (Jun 16)
  - Written responses and one-on-one meetings
  - First “Summary of Feedback and Outcomes” (Sep 16)
- Second RFI and updated draft CfP (Oct 16)
  - Written responses and one-on-one meetings
  - Second “Summary of Feedback and Outcomes” (Dec 16)

## Timeline

- CfP open to submissions for 8.5 weeks.
- Bidders notified of ADSA stream results 14.5 weeks after the CfP closed.

## Key Elements

- S&T challenges grouped in four (4) ADSA domains (air, surface, sub-surface surveillance, and sensor/info mixes)
- Different project types with increasing TRLs and funding limits (studies, concepts, R&D, tech demos and tech pilots)
- Possibility of sequential project proposals

## Selection Process

- Pool of pre-qualified proposals through:
  - Mandatory alignment to ADSA S&T challenges
  - Point-rated technical evaluation
- Funding decisions made by the Assistant Deputy Minister (S&T), based on the Director Generals’ recommendations.
