**Question 3**

-M1 criteria before proceeding with application. If total number of hours worked in the last 10 years, from one resource, that meets the requirements for relevant experience is 9217.85 hrs. Can you please just confirm for me what the minimum number of hours worked required would be? If I take 40 hours/week x 52 weeks/year=2080 x 5 years=10,400. If this is the case, I don't believe I meet the minimum requirement but I want to be sure this is how you calculate things before I abort the application process.

-Can you also tell me, if there are no suitable applicants that meet all of the criteria, are the requirements loosened at all so that other applicants are considered?

**Answer 3**

-One year of full-time work hours is calculated as follows: (5 days per week x 52 weeks per year ) (minus 10 days statutory holiday) (minus 15 days' vacation) = 235 days @ 7.5 hours = 1,762.50 hours  
Five years of full time work = 1762.50 x 5 = 8,812.50 hours.  
Therefore, an individual who has worked 9217.85 hours in the last 10 years, would meet the M1 criteria, as 9217.85 is more than 8,812.50

-Le travail à temps plein est calculé comme suit: (5 jours par semaine x 52 semaines par année) (moins 10 jours de vacances statutaires) (moins 15 jours de vacances) = 235 jours à 7,5 heures = 1 762,50 heures  
Cinq ans de travail à temps plein = 1762,50 x 5 = 8 812,50 heures.  
Par conséquent, un individu qui a travaillé 9217.85 heures au cours des 10 dernières années, répondrait aux critères M1, puisque 9217.85 est supérieur à 8 812,50.

-No, the requirements are not loosened so that other applicants are considered.

-Non, les exigences ne sont pas desserrées pour que les autres candidats soient considérés.
