This solicitation is amended to provide the following information:

Q1. What are length of fleet of LL gear (300ftms in a tub. How many tubs per fleet)?

A1. We are suggesting approximately 500-600 meters (275-330 fathoms). There is some flexibility on the exact length and it can likely be adjusted. If harvesters have a standard practice using 300 fathom of line in a "tub", that will be acceptable.

Q2. What's the hook size and spacing?

A2. Hooks (#4 is common and acceptable) with preferred spacing of between 9 and 18 feet, or 3 to 6 meters is expected, depending on fishing depth. Details of fishing gear deployment will be discussed with successful bidders before contracts are awarded.

Q3. What's the bait requirement for the crab survey?

A3. The bait requirement for the crab survey near Carson and Lilly Canyons will include 3 lbs of squid per pot for a total of 4800 pots. The deployment will be as follows; 600 pots set in each of the two areas (Carson and Lilly), and set baited pots 2 times in each area during each of 2 trips, for a total of 4800 baited pots. That is 14, 400 lbs of squid required.

Q4. On crab project is it required to specify bait cost separately? The day rate as the present Annex B is not quite suitable.

A4. Bidders must provide a complete price breakdown for the work keeping in mind that bids will be evaluated based on the all-inclusive daily rate as specified in the Basis of Payment. Please ensure that all costs are considered when quoting the all-inclusive daily rate.

Q5. Can I provide my own equipment list as I have one that I use for projects?

A5. Yes, please provide an equipment list with your bid. The exact equipment required for the Labrador work could depend on vessel specifications.

Q6. Regarding the catch, is this live release or does the vessel keep the crab?

A6. All catch must be released.

All other terms and conditions remain unchanged.
