

## QUESTION & ANSWER

### Question: 1

Regarding the Replacement of 600 kva Building Transformer.....is Public Works responsible for the disposal of this transformer or will it be the electrical contractor? We may be able to offer a credit for the oil filled unit and other assets, if there is faceplate data available.

### Answer: 1

The specifications and addendum indicate that the transformer is to be disposed of by the contractor. Photos of the existing transformer nameplate and the existing distribution panel nameplate are attached for your reference. They are both slated to be removed and disposed of.
