

PART 1 - GENERAL

- 1.1 REFERENCES
- .1 Canada Green Building Council (CaGBC)
    - .1 LEED Canada-NC Version-2009, LEED (Leadership in Energy and Environmental Design): Green Building Rating System Reference Package For New Construction and Major Renovations.
  - .2 South Coast Air Quality Management District (SCAQMD)
    - .1 SCAQMD Rule 1113-13, Architectural Coatings.
    - .2 SCAQMD Rule 1168-A2011, Adhesive and Sealant Applications.
- 1.2 ACTION AND INFORMATIONAL SUBMITTALS
- .1 Submit in accordance with Section 01 33 00 - Submittal Procedures.
  - .2 Product Data:
    - .1 Submit manufacturer's instructions, printed product literature and data sheets for resilient sheet flooring and include product characteristics, performance criteria, physical size, finish and limitations.
  - .3 Samples:
    - .1 Submit duplicate 300 x 300 mm sample pieces of sheet material, 300 mm long base, nosing, feature strips, treads, edge strips.
  - .4 Sustainable Design Submittals:
    - .1 LEED Canada submittals: in accordance with Section 01 35 21 - LEED Requirements.
- 1.3 MAINTENANCE MATERIAL SUBMITTALS
- .1 Extra Materials:
    - .1 Provide extra materials of resilient sheet flooring and adhesives in accordance with Section 01 78 00 - Closeout Submittals.
    - .2 Provide 15 m<sup>2</sup> of each colour, pattern and type flooring material required for project for maintenance use.
    - .3 Extra materials one piece and from same production run as installed materials.
-

- 1.3 MAINTENANCE MATERIAL SUBMITTALS (Cont'd)
- .1 (Cont'd)
    - .4 Identify each roll of sheet flooring and each container of adhesive.
    - .5 Deliver to Departmental Representative, upon completion of the work of this section.
    - .6 Store where directed by Departmental Representative.
- 1.4 DELIVERY, STORAGE AND HANDLING
- .1 Deliver, store and handle materials in accordance with Section 01 61 00 - Common Product Requirements and with manufacturer's written instructions .
  - .2 Delivery and Acceptance Requirements: deliver materials to site in original factory packaging, labelled with manufacturer's name and address.
  - .3 Storage and Handling Requirements:
    - .1 Store materials off ground, indoors in dry location and in accordance with manufacturer's recommendations in clean, dry, well-ventilated area.
    - .2 Store and protect specified materials from nicks, scratches, and blemishes.
    - .3 Replace defective or damaged materials with new.
  - .4 Develop Construction Waste Management Plan related to Work of this Section and in accordance with Section 01 35 21 - LEED Requirements.
  - .5 Packaging Waste Management: remove for reuse or return of pallets, crates, padding, banding, and packaging materials as specified in Construction Waste Management Plan in accordance with Section 01 74 21 - Construction/Demolition Waste Management and Disposal and Section 01 35 21 - LEED Requirements.
- 1.5 SITE CONDITIONS
- .1 Ambient Conditions:
    - .1 Maintain air temperature and structural base temperature at flooring installation area
-

- 1.5 SITE CONDITIONS .1 (Cont'd)  
(Cont'd) .1 (Cont'd)  
above 20 degrees for 48 hours before, during  
and 48 hours after installation.

PART 2 - PRODUCTS

- 2.1 MATERIALS .1 All hard surface flooring covered by the  
floorscore standard must be certified as  
compliant with the standard (current as of the  
date of this rating system or more stringent  
version) by an independent third-party.  
Flooring/products covered by FlorScore include  
vinyl, linoleum, laminate flooring, engineered  
wood flooring, ceramic flooring, rubber  
flooring and wall base.
- .2 Linoleum sheet flooring: composed of natural  
ingredients which are mixed and calendered  
onto a jute backing:  
.1 Pattern: marbleized .  
.2 Thickness: 3.2 mm.  
.3 Colour: selected by Departmental  
Representative from manufacturer's standard  
colour range.
- .3 Resilient base: continuous, top set, complete  
with premoulded end stops and external  
corners:  
.1 Type: rubber.  
.2 Style: cove.  
.3 Thickness: 2.36 mm.  
.4 Height: 101.6 mm.  
.5 Lengths: continuous roll.  
.6 Colour: selected by Departmental  
Representative from manufacturer's standard  
colour range.
- .4 Resilient stair tread: 1 riser, rubber,  
square nose, 5 mm thick, round, raised surface  
with 50 mm wide detectable warning strip,  
solid colour selected by Departmental  
Representative.
- .5 Resilient stair riser: top set rubber, 3.2 mm  
thick, full riser height, solid pattern, colour  
selected by Departmental Representative.
-

2.1 MATERIALS  
(Cont'd)

- .6 Primers and adhesives: of types recommended by resilient flooring manufacturer for specific material on applicable substrate, above, on or below grade.
  - .1 Rubber floor adhesives:
    - .1 Adhesive: maximum VOC limit 60 g/L to SCAQMD Rule 1168.
    - .2 Cove base adhesives:
      - .1 Adhesive: maximum VOC limit 50 g/L to SCAQMD Rule 1168.
- .7 Sub-floor filler and leveller: as recommended by flooring manufacturer for use with their product.
- .8 Metal edge strips:
  - .1 Aluminum extruded, smooth, mill finish stainless steel with lip to extend under floor finish, shoulder flush with top of adjacent floor finish.
- .9 Edging to floor penetrations: type recommended by flooring manufacturer.
- .10 Sealer and wax: type recommended by resilient flooring material manufacturer for material type and location.
  - .1 Sealer: maximum VOC limit 100 g/L to SCAQMD Rule 1113.

PART 3 - EXECUTION

3.1 EXAMINATION

- .1 Verification of Conditions: verify that conditions of substrate previously installed under other Sections or Contracts are acceptable for resilient sheet flooring installation in accordance with manufacturer's written instructions.
    - .1 Visually inspect substrate in presence of Departmental Representative.
    - .2 Inform Departmental Representative of unacceptable conditions immediately upon discovery.
    - .3 Proceed with installation only after unacceptable conditions have been remedied and after receipt of written approval to proceed from Departmental Representative.
-

3.2 SITE  
VERIFICATION OF  
CONDITIONS

---

- .1 Ensure concrete floors are clean and dry by using test methods recommended by flooring manufacturer.

3.3 APPLICATION:  
FLOORING

---

- .1 Provide high ventilation rate, with maximum outside air, during installation, and for 48 to 72 hours after installation. If possible, vent directly to outside. Do not let contaminated air recirculate through district or whole building air distribution system. Maintain extra ventilation for at least 1 month following building occupation.
  - .2 Apply adhesive uniformly using recommended trowel. Do not spread more adhesive than can be covered by flooring before initial set takes place.
  - .3 Lay flooring with seams parallel to building lines to produce a minimum number of seams.
  - .4 Heat weld seams of linoleum sheet flooring in accordance with manufacturer's printed instructions.
  - .5 As installation progresses, and after installation roll flooring with 45 kg minimum roller to ensure full adhesion.
  - .6 Cut flooring around fixed objects.
  - .7 Install feature strips and floor markings where indicated. Fit joints tightly.
  - .8 Continue flooring over areas which will be under built-in furniture.
  - .9 Continue flooring through areas to receive movable type partitions without interrupting floor pattern.
  - .10 Terminate flooring at centreline of door in openings where adjacent floor finish or colour is dissimilar.
  - .11 Install metal edge strips at unprotected or exposed edges where flooring terminates.
-

- 3.4 APPLICATION:  
STAIRS
- .1 Install stair treads/stair risers one piece for full width of stair. Adhere over entire surface and fit accurately.
- 3.5 APPLICATION:  
BASE
- .1 Lay out base to keep number of joints at minimum.
  - .2 Clean substrate and prime with one coat of adhesive.
  - .3 Apply adhesive to back of base.
  - .4 Set base against wall and floor surfaces tightly by using 3 kg hand roller.
  - .5 Install straight and level to variation of 1:1000.
  - .6 Scribe and fit to door frames and other obstructions. Use premoulded end pieces at flush door frames.
  - .7 Cope internal corners. Use premoulded corner units for right angle external corners. Use formed straight base material for external corners of other angles.
  - .8 Heat weld base in accordance with manufacturer's printed instructions.
- 3.6 CLEANING
- .1 Progress Cleaning: clean in accordance with Section 01 74 11 - Cleaning.
    - .1 Leave Work area clean at end of each day.
  - .2 Final Cleaning: upon completion remove surplus materials, rubbish, tools and equipment in accordance with Section 01 74 11 - Cleaning.
    - .1 Clean flooring and base surfaces to flooring manufacturer's printed instructions.
  - .3 Waste Management: separate waste materials for reuse and recycling in accordance with Section 01 74 21 - Construction/Demolition
-
