SOLICITATION AMENDMENT 002

THE FOLLOWING AMENDMENT TO THE BID DOCUMENTS IS EFFECTIVE IMMEDIATELY. THE
AMENDMENT SHALL FORM A PART OF THE RESULTING CONTRACT DOCUMENTS.

EXTENSION OF TIME:

Bids previously scheduled to close on 25 July 2017, at 2:00 pm NDT, will now close on 9 August 2017 at 2:00 pm NDT.

QUESTIONS AND ANSWERS:

Q1. The length of the crane is stated as "Boom extension at max outreach 7.5m (min)." What is the lifting capacity required at 7.5m?

A1. 760 kg.

Q2. The winch lifting capacity states: Starting Lifting Pressure at approx. 180 bar. Please explain what this means? Is there a limit to the working pressure of the crane and/or winch?

A2. This is only referencing the pressure to the winch. The winch capacity is as listed in Annex "A," 1200 Kg at first layer, 1000 Kg at third layer.

Q3. They have mentioned the max outreach and the winch line pull minimum, are we to assume that the load capacity of the crane need only match the max line pull of the winch, such as 1200kg at 7.5m.?? There is no specific load capacity listed. Please advise load capacity.

A3. Please see the Load Chart, as attached separately.

Q4. We can provide the DNV or equivalent class approvals, but first we need to know how they will use this crane, like at the dock only or at sea with a sea-state condition?

A4. The crane is going to be used as a stores crane for dockside use only.

Q5. No mention of a Hydraulic Power Unit, do they have a separate supply of hydraulic pressure? Please confirm.

A5. The intention is to use the existing HPU supply. The existing power unit has a Denison Hydraulics Pump, Model T6CM B14, Working Pressure 20 MPa, Oil supply 40 l/min.

Q6. Does Canada want the HPU supply with the new crane?

A6. The intention is to use the existing HPU supply. The existing power unit has a Denison Hydraulics Pump, Model T6CM B14, Working Pressure 20 MPa, Oil supply 40 l/min.

All other terms and conditions remain unchanged.
