This amendment 004 is raised to answer a question and to extend the closing bid date to August 04, 2017 at 2:00 PM.

**QUESTION :**

In the previous tender's first amendment - sect. 2.1 - Canada suggests that 2.1 meters is the maximum allowed height as it is the height of the clean room door. This new tender indicates that many pieces can be as tall as 2.4 meters. (0.3m higher than the supposed door height)

As far as fitting machinery through the doorway goes, can you please advise what the exact door dimensions are? From our analysis of the latest tender we gather that the door is at least 2.4 meters wide and 2.4 meters tall. Can you confirm?

**ANSWER :**

There are two different door heights because not all the equipment will be located in the same laboratory space.

Anhydrous room door: height 2.4 meters  
width 2.15 meters

Laboratory door CIMI-L6-012: height 2.1 meters  
Width 1.48 meters

Also here is a list of equipment's that will be located in each lab to avoid confusion:

Anhydrous room:

- Pouch-cell side sealer
- Pouch-cell electrolyte filling and degassing
- Battery stack assembly

Laboratory CIMI-L6-012:

- Electrode cutting
- Calender
- Pouch forming
- Coater
- Mixer
- Filmix

**All other terms and conditions remain unchanged**
