Question 002

Annex B – Purchase Description, paragraph 3.22.2 – The generator must be mounted at the left front of the V nose of the trailer, not external to the A frame.

Where you are asking for the storage, is a workstation location based on the Appendix 1 of Annex B.

Is it possible to move the workstations down towards the back to make room for the generator housing?

Answer 002

No. The workstations cannot be moved due to the space requirements of the UAV. The generator requirements outlined in Annex B – Purchase Description, paragraph 3.22.2 and 3.22.6 have been amended as follows:

DELETE:

3.22.2 The generator must be mounted at the left front of the V nose of the trailer, not external to the A frame.

INSERT:

3.22.2 The generator must be supplied with the trailer and must be secured in the cargo area ready for deployment.

- a) The generator frame must be provided with a minimum of two (2) wheels and two (2) handles so that the generator can be moved by a single operator.
- b) The generator frame must be provided with a minimum of two (2) sets of lifting points to allow it to be carried by 2 operators.
- c) The generator frame must be equipped with tie down points designed to secure the generator during transport.
- d) The generator must connect directly to the shoreline receptacle cable specified in paragraph 3.23.2.

DELETE:

3.22.6 The enclosure must not impede the generator operation or generator maintenance.

INSERT:

3.22.6 The generator frame must not impede the generator operation or generator maintenance.
