**AMENDMENT 003 TO SOLICITATION NUMBER W6369-17-A048/B IS RAISED TO:**

1. Provide clarification and answers to questions from potential suppliers; and
2. Extend the solicitation closing date by seven (7) calendar days from 07 August 2017 to 14 August 2017.

**QUESTIONS AND ANSWERS:**

<b>Question 3</b>	Is it possible to get a picture or a part number of the “Pelican Case” that you have requested a quote for an industrial washer?
<b>Answer 3</b>	The Pelican Cases that are of interest to DND, are Pelican Case 1650 and Pelican Case 1660. Please see hyperlinks, below that show pictures of the Pelican Cases.  Pelican Case 1650  <a href="https://www.bhphotovideo.com/c/product/75519-REG/Pelican_1650_020_110_1650_Case_with_Foam.html">https://www.bhphotovideo.com/c/product/75519-REG/Pelican_1650_020_110_1650_Case_with_Foam.html</a>  Pelican Case 1660  <a href="http://n.stuccu.ca/s/Pelican+1660+Case">http://n.stuccu.ca/s/Pelican+1660+Case</a>

<b>Question 4</b>	Are the cold and warm liquids recirculated?
<b>Answer 4</b>	No. The cold and warm liquids are not recirculated.

<b>Question 5</b>	What are adjustable sanitary legs?
<b>Answer 5</b>	The purpose of the adjustable sanitary legs, is to support the machine off the floor, so that the area beneath the machine can be adequately cleaned and maintained.

<b>Question 6</b>	We are using timers for the cycles? Do you prefer a Programable Logic Controller (PLC)? This will increase the cost and not really providing a better flexibility.
<b>Answer 6</b>	DND is not interested in a Programmable Logic Controller (PLC), or any timer that is fancy. A simple analog, or a mechanical timer, is sufficient for this particular requirement.

<b>Question 7</b>	Regarding requested item number M12, Unfortunately you cannot operate this equipment with 120 volts. Between the circulation pump and electric tank heating will be over 10 Kw. You can consider using a step down transformer, it will be quite large or modification in voltage. Since other manufacturer asked for this item too. Please advise.
<b>Answer 7</b>	DND is not looking for a modified power source through a step-up or step-down transformer. There are units on the

	market that are powered as follows:  120 Volts 1PH 60Hz FLaA=1
--	---

<b>Question 8</b>	Please advise the orientation of the case you want to clean. What are the dimensions of the open side, this is the side to be placed face down in the washer?
<b>Answer 8</b>	For the orientation of the case, DND has a strong preference for a front load machine, however DND will be able to accommodate side load as well. The dimensions of the washer can be found in the Statement of Requirement at Annex A on page 17 of 20 of the original Request for Proposal (RFP).

<b>Question 9</b>	Do you have a photo of the case or cases that will be being washed? (I am familiar with some Pelican cases, but SOP is to have pics of the “average” item being cleaned to determine spray head styles and motor requirements.)
<b>Answer 9</b>	See “Answer 3,” above.

<b>Question 10</b>	Is it possible to extend the closing time of this opportunity?
<b>Answer 10</b>	The solicitation closing date has now been extended to 14 August 2017 at 14:00 (EDT).

**SOLICITATION NO. W6369-17-A048 IS HEREBY AMENDED AS FOLLOWS:**

1.1 DELETE from Page 1, “07 August 2017” and REPLACE with “14 August 2017”.

**ALL OTHER TERMS AND CONDITIONS REMAIN THE SAME.**
