Description of the Requirement:

The programmer / analysts will assist Environment and Climate Change Canada (ECCC) as follows:

- Design and development of business related .NET applications to support established priority projects.
- Creation of unit tests to support the development and maintenance of .Net applications.
- Design and development of SQL databases and their associated entities to support the development of .Net applications.
- Support the development and configuration of Microsoft Dynamics CRM applications
- Provide integration between .Net applications and other ECCC systems.
- Provide application testing support as required.
  - Creation of associated supporting documentation including but not limited to system design documents, inline code/comments, user guides and testing matrices.
  - Ensuring design compliance with CLF2.0 and WCAG2.0 AA standards

Proposed period of contract:

It is intended to result in the award of one (1) contract for a period from contract award to March 31, 2018, plus three (3) one (1) year irrevocable options allowing Canada to extend the term of the contract.
