This amendment has been raised to answer the following question from industry:

Q1

For item 1.2 – “Food cart must have molded rails to accommodate thirty (30) 18” x 14” cafeteria trays as well as a gap of at least 10 ½” between rails accommodate 10 ½” x 16 ½” “deep welled insulated meal trays”.

Could you please clarify if the “gap of at least 10 ½” is across the body interior (left-to-right) or between each rail on each side of the body interior (up-and-down).

If the gap is to be 10 1/2 “ up-and-down, there is no way the cabinet can accommodate 30 trays and still be under 64” height as per item #1.3.

A1

The gap of 10 ½” is left to right so that the insulated trays can fit in between the rails.

If we use the 18” x 14” trays, they will slide into the rails, if we use the 10 ½” x 16 ½” trays, then they will sit on the bottom of the cart and be stacked on top of each other between the rails.
