PART 3 - BID PREPARATION INSTRUCTIONS

3.1 Bid Preparation Instructions

Canada requests that Bidders provide their bid in separately bound sections as follows:

Section I: Technical Bid: One (1) hard copy) OR one (1) electronic copy in PDF format; Section II: Financial Bid: One (1) hard copy OR one (1) electronic copy in PDF format; Section III: Certifications: One (1) hard copy OR one (1) electronic copy in PDF format

Prices must appear in the financial bid only. No prices must be indicated in any other section of the bid.

Canada requests that Bidders follow the format instructions described below in the preparation of their bid:

(a) use 8.5 x 11 inch (216 mm x 279 mm) paper;

(b) use a numbering system that corresponds to the bid solicitation.

In April 2006, Canada issued a policy directing federal departments and agencies to take the necessary steps to incorporate environmental considerations into the procurement process Policy on Green Procurement (http://www.tpsgc-pwgsc.gc.ca/ecologisation-greening/achats-procurement/politique-policy-eng.html). To assist Canada in reaching its objectives, Bidders should:

- 1) use 8.5 x 11 inch (216 mm x 279 mm) paper containing fibre certified as originating from a sustainably-managed forest and containing minimum 30% recycled content; and
- 2) use an environmentally-preferable format including black and white printing instead of colour printing, printing double sided/duplex, using staples or clips instead of cerlox, duotangs or binders.

Section I: Technical Bid

In their technical bid, Bidders should demonstrate their understanding of the requirements contained in the bid solicitation and explain how they will meet these requirements. Bidders should demonstrate their capability and describe their approach in a thorough, concise and clear manner for carrying out the work.

The technical bid should address clearly and in sufficient depth the points that are subject to the evaluation criteria against which the bid will be evaluated. Simply repeating the statement contained in the bid solicitation is not sufficient. In order to facilitate the evaluation of the bid, Canada requests that Bidders address and present topics in the order of the evaluation criteria under the same headings. To avoid duplication, Bidders may refer to different sections of their bids by identifying the specific paragraph and page number where the subject topic has already been addressed.

Section II: Financial Bid

3.1.1 Bidders must submit their financial bid in accordance with the Basis of Payment in Annex "B". The total amount of Applicable Taxes must be shown separately.

3.1.2 Electronic Payment of Invoices – Bid

If you are willing to accept payment of invoices by Electronic Payment Instruments, complete Annex "D" Electronic Payment Instruments, to identify which ones are accepted.

If Annex "D" Electronic Payment Instruments is not completed, it will be considered as if Electronic Payment Instruments are not being accepted for payment of invoices.

Acceptance of Electronic Payment Instruments will not be considered as an evaluation criterion.

3.1.3 SACC Manual Clauses

C3011T (2013-11-06) Exchange Rate Fluctuation

Section III: Certifications

Bidders must submit the certifications and additional information required under Part 5.

PART 4 - EVALUATION PROCEDURES AND BASIS OF SELECTION

 - a. comply with all the requirements of the bid solicitation; and

- b. meet all mandatory criteria; and

The rating is performed on a scale of 100 points.

- 2. Bids not meeting (choose "(a) or (b) or (c)" will be declared non-responsive.
- 3. The selection will be based on the highest responsive combined rating of technical merit and price. The ratio will be 80 % for the technical merit and 20% for the price.
- 4. To establish the technical merit score, the overall technical score for each responsive bid will be determined as follows: total number of points obtained / maximum number of points available multiplied by the ratio of 80 %.
- 5. To establish the pricing score, each responsive bid will be prorated against the lowest evaluated price and the ratio of 20%.
- 6. For each responsive bid, the technical merit score and the pricing score will be added to determine its combined rating.

- 8. This process will result in the award of one or more contracts to meet the requirement.

Closing date /time: Sep 6th, 2017 at 14:00Hrs MDT

The Contractor must forward to the Contracting Authority within ten (10) working days after the date of award of the Contract, a Certificate of Insurance evidencing the insurance coverage and confirming that the insurance policy complying with the requirements is in force. Coverage must be placed with an Insurer licensed to carry out business in Canada. The Contractor must, if requested by the Contracting Authority, forward to Canada a certified true copy of all applicable insurance policies.

7.12.2 The Contractor must obtain Commercial General Liability Insurance, and maintain it in force throughout the duration of the contract, in an amount usual for a contract of this nature, but for not less than \$2,000,000 per accident or occurrence and in the annual aggregate.

The Commercial General Liability policy must include the following:

- 4. Personal Injury: While not limited to, the coverage must include Violation of Privacy, Libel and Slander, False Arrest, Detention or Imprisonment and Defamation of Character.
- 5. Cross Liability/Separation of Insured: Without increasing the limit of liability, the policy must protect all insured parties to the full extent of coverage provided. Further, the policy must apply to each Insured in the same manner and to the same extent as if a separate policy had been issued to each.
- 6. Blanket Contractual Liability: The policy must, on a blanket basis or by specific reference to the contract, extend to assumed liabilities with respect to contractual provisions.
- 7. Employees and, if applicable, Volunteers must be included as Additional Insured.
- 8. Employers' Liability (or confirmation that all employees are covered by Worker's compensation (WSIB) or similar program)
- Broad Form Property Damage including Completed Operations: Expands the Property Damage
 coverage to include certain losses that would otherwise be excluded by the standard care, custody or
 control exclusion found in a standard policy.

- 11. If the policy is written on a claims-made basis, coverage must be in place for a period of at least 12 months after the completion or termination of the contract.

All expenses incurred by Canada to co-defend such actions will be at Canada's expense. If Canada decides to co-defend any action brought against it, and Canada does not agree to a proposed settlement agreed to by the Contractor's insurer and the plaintiff(s) that would result in the settlement or dismissal of the action against Canada, then Canada will be responsible to the Contractor's insurer for any difference between the proposed settlement amount and the amount finally awarded or paid to the plaintiffs (inclusive of costs and interest) on behalf of Canada.

7.12.3 In addition to the insurance requirements detailed in 14.2.2 above:

The Contractor must obtain Errors and Omissions Liability (a.k.a. ANNEX "A"

STATEMENT OF WORK

1. Background:

The National Energy Board requires the services of highly qualified, experienced pipeline engineers to support the NEB in evaluating the engineering-related filings during peak workload periods.

2. Objective:

Qualified engineers will be available to the NEB to provide "as and when required" consulting services to conduct analysis of engineering information filed with the NEB specifically to review complete hydrocarbon storage facility risk assessment and strain-based design of pipelines. This will enable the NEB to meet expected timelines during peak workload periods or when the NEB requires unique technical (engineering) expertise.

3. Scope of Work:

The selected contractor(s) will provide expert advice to the NEB to assess filings with respect to engineering design and construction, pipeline and facility integrity, safety and risks, as well as proposed mitigation and prevention measures. The contractor will assess technical information with respect to compliance with the requirements of the NEB Act, Rules of Practice and Procedure, the Onshore Pipeline Regulations, CSA Z662 and the NEB Filing Manual. The work may also include the review of associated material received from outside parties related to the filing. The contractor(s) is also expected to provide the NEB with expert technical advice regarding potential deficiencies and issues posed by the identified hazards or risks.

It is expected that technical reviews, evaluation and advice would be required in the following areas, including but not limited to:

- Hydrocarbon storage facility risk assessments; and
- Pipeline strain-based design

For the storage facility risk assessments related work, contractor(s) must be familiar with, but not limited to:

Consequence quantification approaches and models related to fire and explosions such as

Guidelines from Center for Chemical Process Safety (CCPS), and Oil and Gas Producers (OGP) reports; and

Office national

Risk thresholds and risk acceptable criteria such as As Low As Reasonably Practicable (ALARP),
Major Industrial Accidents Council of Canada (MIACC), and Methods used by UK HSE (Health,
Safety and Environment).

For the strain-based design related work, contractor(s) must be familiar with, but not limited to:

- Accessing the adequacy of the design criteria; and
- Related standards, specifications, and test methods.

At a minimum, it is expected that the contractor(s) will:

- Provide technical/engineering review, assessments, advice and professional opinions to the
 extent to which identified issues or information gaps are addressed in the filings and associated
 updates submitted by regulated companies;
- Provide expertise in reviewing responses to the NEB's Information Requests related to the above-noted topics; and
- Review and assess information filed by external parties related to technical regulatory filings.

The contractor(s) will be expected to deliver expert advice in the form of oral or written communication depending upon the preference of NEB staff. NEB staff will maintain a record of deliverables received from the contractor(s).

Contractor(s) specialized in hydrocarbon storage facility risk assessments and/or strain-based design can be applied.

Deliverables:

Each individual task will be initiated via a written Task Authorization, signed by the Project Authority and the selected Contractor. Each Task Authorization will specify the deliverables for that task and the expected timelines. Deliverables will typically be in the form of a discussion or written report providing analysis and advice.

Exclusions:

Contractor will be able to conduct the work at their own location.

Office equipment (e.g. computer, telephone) would typically not be supplied.
