PART 3 - OFFER PREPARATION INSTRUCTIONS

3.1 Offer Preparation Instructions

Canada requests that Offerors provide their offer in separately bound sections as follows:

- Section I: Technical Offer (1 hard copy)
- Section II: Financial Offer (1 hard copy)
- Section III: Certifications (1 hard copy)

Prices must appear in the financial offer only. No prices must be indicated in any other section of the offer.

Canada requests that Offerors follow the format instructions described below in the preparation of their offer.

- (a) use 8.5 x 11 inch (216 mm x 279 mm) paper;
- (b) use a numbering system that corresponds to that of the Request for Standing Offers.

In April 2006, Canada issued a policy directing federal departments and agencies to take the necessary steps to incorporate environmental considerations into the procurement process [Policy on Green Procurement](http://www.tpsgc-pwgsc.gc.ca/ecologisation-greening/achats-procurement/politique-policy-eng.html) (<http://www.tpsgc-pwgsc.gc.ca/ecologisation-greening/achats-procurement/politique-policy-eng.html>). To assist Canada in reaching its objectives, offerors should:

- 1) use 8.5 x 11 inch (216 mm x 279 mm) paper containing fibre certified as originating from a sustainably-managed forest and containing minimum 30% recycled content; and
- 2) use an environmentally-preferable format including black and white printing instead of colour printing, printing double sided/duplex, using staples or clips instead of cerlox, duotangs or binders.

Section I: Technical Offer and Additional Information

Technical Offer

In their technical offer, Offerors should explain and demonstrate how they propose to meet the requirements and how they will carry out the Work.

A. Consolidated Requirement and Zones

The requirements shown at Appendix "A" have been arranged by product type and delivery method within zones (geographical areas). Where there is more than one individual requirement for a particular product type with the same delivery method within a zone, the quantity of each individual requirement has been consolidated into one consolidated requirement. In such instances, the Offeror must quote a price per litre applicable to the entire consolidated requirement.

An offer contingent on supplying only a portion of a consolidated requirement will result in the offer being declared non-responsive. Any other conditional offers will be declared non-responsive.

B. Equally Acceptable Products (applies only to F-34 aviation fuel requirements identified in Appendix "A")

Offerors have the option of submitting an offer on either of the following two fuel types:

Option 1: An offer for Aviation Turbine Fuel (Military Grade F-34) (CAN/CGSB-3.24-2016 latest issue)

Option 2: An offer for Aviation Turbine Fuel (grade Jet A-1) containing Fuel System Icing Inhibitor (FSII) and Corrosion Inhibitor (CI) (Standard CAN/CGSB-3.23-2016 latest issue).

There will be no preference given to either option, both are equally acceptable.

The Offeror will insert which product will be supplied and the per unit price in Appendix "A".

C. Alternate Products

In lieu of the requested Aviation Turbine Fuel (Military Grade F-34)(CGSB-3.24-2016 latest issue), or equally acceptable Aviation Turbine Fuel (grade Jet A-1) (CAN/CGSB-3.23-2016 latest issue), containing Fuel System Icing Inhibitor (FSII) and Corrosion Inhibitor (CI), as stated in Appendix "A", the Offeror may offer the following alternate product:

Aviation Turbine Fuel (grade Jet A-1) Standard CAN/CGSB-3.23-2016 (latest issue), containing Fuel System Icing Inhibitor (FSII).

This alternate product will only be considered if no offer is received for the requested product or the equally acceptable product.

The Offeror should insert the alternate product to be supplied and the per unit price in Appendix "A", wherever applicable.

Additional Information

Technical Proposal (TP)

Offerors must submit a Technical Proposal (TP). The TP is for information purposes only and will not form part of the evaluation. Offerors should provide the TP with their offer or promptly thereafter. If the TP has not been received by the time the evaluation of offers is completed, the Standing Offer Authority will request it in writing from the Offeror. Failure to provide a TP within the requested time frame will render the offer non-responsive.

The TP must explain the process (may use process maps, flow charts, schematic diagrams, etc.) that will be followed by the Offeror and its representatives, following issuance of the Standing Offer, to carry out production, delivery, and ensure quality control of product. The TP must cover, at a minimum, the following:

- (1) Identify the source(s) of supply (refinery, terminal, and manufacturer) of the product (fuel component(s), additive(s)).
- (2) If subsequent commingling or blending is required, identify the location and the products to be commingled or blended.
- (3) Identify the physical location where the fuel is certified and/or re-certified.
- (4) Identify the transfer and distribution point(s), and intermediary storage.
- (5) Identify the transportation type(s), mode(s) and transporter(s) to the storage and distribution point(s), and DND facilities.

- (6) Identify the standard utilized to prepare transport vessels and equipment.
- (7) Explain the control of quality and traceability maintenance, and identify the test procedures, records retention and distribution.
- (8) Explain the testing process and identify the inspection and verification points, frequency, tests to be carried out, and laboratory involved.
- (9) In order to support high consumption periods, such as disaster relief, air shows, military exercises, etc., the Offeror must provide a delivery plan that will demonstrate its capability to substantially increase fuel deliveries to the following DND bases, and within 48 hrs:

<u>DND Base</u>		<u>Average weekly fuel requirement</u>
CFB Trenton	ON151 58/TW	750,000 litres
CFB Bagotville	PQ241 58/TW	400,000 litres
CFB Winnipeg	MB001 58/TW	150,000 litres
CFB Cold Lake	AB181 58/TW	707,000 litres

(The frequency of deliveries and volumes is difficult to predetermine however, previous high consumption periods have resulted in fuel orders that have doubled or even tripled average weekly fuel requirements. Also, a high consumption period could last anywhere from a few days to several weeks)

The Technical Proposal will be reviewed by DND’s Quality Engineering Test Establishment (QETE) to validate the Offeror’s technical capability and capacity.

Section II: Financial Offer

Offerors must submit their financial offer in accordance with Appendix “A”, and Appendix “B”, Basis of Payment. The total amount of applicable taxes must be shown separately.

Offerors must submit an individual price for each consolidated requirement (product type with the same delivery method, within a zone (geographical area)) they wish to compete for. Offers are to be based on the corresponding “A” week value of Appendix “B”, Basis of Payment.

A. Unit price

The firm unit prices per litre offered must be in Canadian dollars and must not exceed four decimal places.

All applicable delivery charges must be included in the firm unit prices per litre.

B. Drums (if applicable)

(If applicable, the Offeror will fill in this clause applicable to drummed requirements)

Drums will be charged extra at \$ _____ each.

Credit in full will be allowed for each drum returned by Canada in good condition, freight prepaid from client’s premises to: _____.

No additional charges are to apply for drums returned that are not in good condition.

C. Unit Price Adjustments

I. Reference Marker Option

For Aviation Turbine Fuel requirements in the province of British Columbia and the Yukon Territory, the Offeror should select only one Reference Marker, either "USGC" or "LA PIPELINE". Offerors should indicate the Reference Marker that applies to its offer(s) by inserting an X in the space provided below.

USGC _____ LA PIPELINE _____

II. Adjusted Price Effective Day:

After the initial price change, which comes into effect on date of issuance of standing offer, all subsequent price adjustments will come into effect at 12:01 AM on the day selected by the Offeror below.

The Offeror should select the day of the week on which their weekly price change comes into effect.

3.4 CANADIAN UNBRANDED RACK PRICES

Bloomberg Briefs: Oil Buyer's Guide Average Canadian Unbranded Rack Price for "Prem Unl", as published in the Weekly Pricing and Data Supplement (latest issue), will be used.

4. AREA OF COVERAGE FOR EACH REFERENCE MARKER

4.1 Aviation Turbine Fuel

The firm unit prices per litre shown at Appendix "A" for Aviation Turbine Fuel, for requirements in the provinces of Ontario, Quebec, New Brunswick, Prince Edward Island, Nova Scotia and Newfoundland and Labrador, are subject to adjustment using the Reference Marker for "NYH" detailed above.

The firm unit prices per litre shown at Appendix "A" for Aviation Turbine Fuel, for requirements in the provinces of Manitoba, Saskatchewan, Alberta, and the Northwest Territories are subject to adjustment using the Reference Marker "USGC" detailed above.

The firm unit prices per litre shown at Appendix "A" for Aviation Turbine Fuel, for requirements in the province of British Columbia and the Yukon Territory, are subject to adjustment using the Reference Marker _____ (*Standing Offer Authority will indicate either "USGC" or "LA PIPELINE" as selected by the Offeror in Part 3, Section II.C., Unit Price Adjustments*) detailed above.

4.2 Gasoline Aviation Grade 100LL

The firm unit prices per litre shown at Appendix "A" for Gasoline Aviation Grade 100LL are subject to adjustment using the Reference Marker described in "**Canadian Unbranded Rack Prices**". The designated centers are as follows:

Montreal for requirements in the province of Québec;
Toronto for requirements in the province of Ontario; and
Vancouver for requirements in the province of British Columbia.

5. METHOD OF CALCULATING UNIT PRICE ADJUSTMENTS

The firm unit prices per litre shown at Appendix "A" will be subject to upward or downward adjustments using weekly price changes, detailed below.

Appendix B – Basis of Payment

File No. E60HL-7-0052-18-C

5.1 Weekly Price Adjustment Effective Day:

After the initial price adjustment, which comes into effect on date of issuance of standing offer, all subsequent price adjustments will come into effect at 12:01 AM on _____ of each week. *(Standing Offer Authority will indicate the day of the week as selected by the Offeror in Part 3, Section II.C, Unit Price Adjustments)*

5.1.1 An adjustment to the firm unit prices per litre will be calculated as indicated hereunder:

- a) Initial Adjustment: the unit price adjustments effective on date of issuance of standing offer will be equal to the applicable Reference Marker price for the week ending October 13, 2017 ("B" week value) minus the applicable Reference Marker price for the week ending November 4, 2016 ("A" week value) plus the offer price;
- b) Subsequent Weekly Adjustments: the unit price effective on day of the week identified above for every subsequent week will be equal to the Reference Marker price for the previous week minus the 'A' week value Reference Marker price plus the Offer price.

5.1.2 For Reference Markers, "NYH", "USGC" and "LA PIPELINE", the average weekly assessment will be:

- a) converted from U.S. funds to Canadian funds using the week average of the Bank of Canada official exchange rate for the corresponding week;
- b) converted from U.S. gallon to litres using 3.785412 as the conversion factor.

5.1.3 The Reference Marker price converted to Canadian dollars per litre will be rounded to four decimal places to the nearest hundredth of a cent per litre (\$0.0001/litre). Not considering any resultant value in the sixth decimal place, the fifth decimal place will be rounded as follows; less than or equal to \$0.00004 rounded down, \$0.00005 - \$0.00009 rounded up.

5.1.4 Example calculation using the " LA PIPELINE" Marker:
(All prices indicated are for example purposes only)

Related "LA PIPELINE" marker price for week ending September 9, 2016 = \$ 1.8713

Related "LA PIPELINE" marker price for week ending September 16, 2016 = \$ 1.7886

Bank of Canada official exchange rate for week ending September 9, 2016 = \$ 1.1190 per U.S.dollar

Bank of Canada official exchange rate for week ending September 16, 2016 = \$ 1.1209 per U.S.dollar

Litres in a US gallon = 3.785412

- a) $(\$ 1.8713 \times \$ 1.1190) / 3.785412 = \$ 0.553172$ rounded to Cdn.\$ 0.5532 per litre
- b) $(\$ 1.7886 \times \$ 1.1209) / 3.785412 = \$ 0.529623$ rounded to Cdn.\$ 0.5296 per litre
- c) b) minus a) = decrease of \$ 0.0236 per litre
