All other terms and conditions remain unchanged.

## ADDENDUM #3

Date: October 5, 2017

CANADIAN FOOD INSPECTION AGENCY  
AHU REPLACEMENT/EXHAUST MANIFOLD  
BURBABY BC  
Project No: R.39903-180402

---

The following revisions supersede the information contained in the original drawings and specification issued for the above named project, and shall become part thereof. No consideration will be allowed for extras due to the contractor or any subcontractor not being familiar with this Addendum.

---

### **1.0 CONTRACTOR QUESTIONS:**

1. Please clarify what type or number stormceptor is required.

**Response: Oil Interceptor unit specifications are found in Clause 2.11 of Specification 33 40 01. The Contractor will be required to source from a supplier and submit shop drawings of a proposed unit for review and approval by the Departmental Representative prior to installation.**

2. The drawings note to prepare and submit an Erosion and Sediment Control Plan. Please confirm this requirement is needed.

**Response: Yes. Guichon Creek (which leads to Still Creek) is immediately adjacent to and downstream of the site, so adequate protection measures must be in place during construction.**

3. Spec Section 02 41 99 item 1.4.1 indicate hazardous materials have been identified in the building. Please provide the hazardous materials survey.

**Response: An asbestos survey was conducted and will be released to the successful bidder upon award. Note that the survey identifies asbestos containing materials in the areas identified in point 1.4.1 of section 02 41 99 of the specification.**

4. Please clarify the staging area(s) to be made available for the contractor's use. Please also confirm the area provided is sufficient to hold the number of bins required by the Waste Management Plan.

**Response: The Contractor will be able to use the fenced enclosure in which the AHU's will eventually be located along with the shipping container (40 ft.) for storage. One waste bin can be placed on the side of the building along the existing driving on the east side of the building.**

5. Please provide details for the new guardrails at the roof.

**Response: Refer to 5/A214 for a typical guardrail detail.**

### ADDENDUM #3

Date: October 5, 2017

CANADIAN FOOD INSPECTION AGENCY  
AHU REPLACEMENT/EXHAUST MANIFOLD  
BURBABY BC  
Project No: R.39903-180402

---

The following revisions supersede the information contained in the original drawings and specification issued for the above named project, and shall become part thereof. No consideration will be allowed for extras due to the contractor or any subcontractor not being familiar with this Addendum.

---

6. The architectural drawings show a number of exhaust fans to be removed. However, the drawings do not indicate if these are to be capped, re-roofed, etc. Please clarify.

**Response: “Refer to mechanical drawings M-200 through M-211 for information on exhaust fan removal/new duct connections/new duct routing. Refer to detail “TYP. ROOF EXHAUST FAN REMOVAL AND NEW CONNECTION” on sheet M-212 for additional information.”**

7. Specification Section 31.63.33.2.5 requires the application and protection of a viscous coating on the Micro Pile surface. Please specify a pre-approved coating for use with micro-piles installed using a down-hole hammer.

**Response: Nano painting or bitumen are acceptable coatings.**

#### **2.0 ARCHITECTURAL DRAWINGS:**

1. Revise PARTIAL A04 – CRAWL SPACE NEW PLAN as per attached AD-01.
