

RFP ISED 186532 – TBIPS A.16 Web and Multimedia Content Consultant – L3

Questions Received

Q1- In a search of all BuyandSell solicitation postings issued since January 2016, the Web Multi-Media Content Consultant category appeared in the summary write-up of only 13 solicitations. Due to the relatively infrequent use of the TBIPS Web Multi-Media Content Consultant category within the Federal Government, and as per other TBIPS solicitations where it is accepted, will the Crown accept cross-mapping of other TBIPS roles where more than 50% of the Web Multi-Media Content Consultant category tasks can be demonstrated?

A1- The Crown will accept a cross mapping to a different TBIPS resource category provided that the bidder demonstrates more than 50% of the Web Multi-Media Content Consultant category tasks. Please see amendment #1 attached to this NPP for the revision.

Q2- A Web Multi-Media Content Consultant would normally be involved in the initial design phase of a system and then brought in occasionally to perform reviews or “spot-check” achievement to-date. As a result it would be uncommon to place consultants for contract durations of at least 8 months. Would the Crown consider reducing the minimum month duration to three (3) months to be more reflective of typical project usage patterns?

A2- Yes, the Crown will accept a reduction in the minimum month duration to three (3) months. Please see amendment #1 attached to this NPP for the revision.
