Please amend the above mentioned bidding solicitation with the changes below:

Question 13: Item 7.3.4.6 of the Technical Statement of Requirement of the Invitation to Tender.

The technical specification paragraph 7.3.4.6 asks:

“must apply a coating of:

An abrasion resistant pure epoxy coating pigmented with Aluminum with a DFT of 125 micron

A tar free epoxy tie coating for a DFT of 263 micron

An acrylic polyurethane finish for a DFT of 100 micron

And a coat of entire above waterline with an acrylic polyurethane finish for a DFT of 125 micron.

The Contractor must apply a coating compatible with the existing coating system. The existing coating system is intershield 300, intergard 263 and interthane 990.

The thickness of the polyurethane seems too important, even impossible to achieve in one coat.”

Should we rather trust the original paint specification (AF6095-63100-01 AF PAINT SCHEDULE)?

“Abrasion resistant pure epoxy coating pigmented with aluminum bronze 125

Tar free, epoxy tie coat Light grey 75

Acrylic polyurethane finish coast guard red 3000 50”

Answer 13:

Yes, use the original paint specification for paragraph 7.3.4.6

Appendix 1 of Annex I

Note: PWGSC reserves the right to exercise all the options or partial options.

The Contractor grants to Canada the irrevocable option to acquire the goods, services or both described at Annex A of the Contract under the same conditions and at the prices and/or rates stated in the Contract. The option may only be exercised by the Contracting Authority and will be evidenced, for administrative purposes only, through a contract amendment. The Contracting Authority may exercise the option within **5 days** after beginning of work by sending a written notice to the Contractor.

\$	\$	\$

Remark to Bidders:

Canada may reject the bid if any of the prices submitted do not reasonably reflect the cost of performing the part of the work to which that price applies.

All other clauses and conditions from the bidding solicitation remain the same.
