This solicitation amendment 009 is to respond to a question from the industry.

Question: During the CD Howe visit, we had requested clarification regarding page 3 of Annex A – Lighting. Will PWGSC consider changes to the original lighting systems?

Generally the original lighting systems consist of surface type 1,220 mm fluorescent fixtures with one (1) F32T8 lamp mounted in a 1,500 mm x 1,500 mm coffered ceiling. The lighting power density (LPD) in a typical 30' x 30' office bay, based on 30W per fixture for a one (1) lamp fixture is 13.3W/sq.m. Since the process of renovating the floors to the new lighting system is on-going, we will not consider changes to the original lighting systems in the report.

Response:

ESCo's are free to consider and recommend measures to any of the lighting systems at the C.D. Howe Building.

No further changes apply
