

ADVANCE CONTRACT AWARD NOTICE (ACAN)

1. Advance Contract Award Notice (ACAN)

An ACAN is a public notice indicating to the supplier community that a department or agency intends to award a contract for goods, services or construction to a pre-identified supplier, thereby allowing other suppliers to signal their interest in bidding, by submitting a statement of capabilities. If no supplier submits a statement of capabilities that meets the requirements set out in the ACAN, on or before the closing date stated in the ACAN, the contracting officer may then proceed with the award to the pre-identified supplier.

2. Definition of Requirements

The objective of this task is to produce higher-quality direct normal irradiance (DNI) and global horizontal irradiance (GHI) satellite-derived solar resource data for south of Canada for the period of two (2) years covering calendar years 2016 and 2017 using improved satellite solar resource estimating model during snow conditions and persistent cloud cover. The minimum eastern region extends from 52 to 90 degrees west in longitude and from 40 to 58 degrees north in latitude. The minimum western region extends from 90 to 135 degrees in longitude and from 47 to 58 degrees in latitude. Data to be produced with a ground resolution of a minimum 1/10th of one degree in both latitude and longitude. The data will consist of: (1) gridded yearly and monthly means of both irradiance components suitable to mapping and (2) site and time specific hourly DNI and GHI time series for all grid points in the selected region.

This requirement is as follows:

- 1) Assembling model input data for the selected region, acquiring all input (e.g. visible and Infra-red (IR) channel imagery data for both 2016 and 2017).
- 2) Applying bidder's existing satellite model and data production
- 3) Preparing model output for export in both ASCII and binary data

3. Criteria for Assessment of the Statement of Capabilities

Any interested supplier must demonstrate by way of a statement of capabilities that it meets the following requirements:

- Must have accesses to a validated satellite-based solar resource model that was previously and independently evaluated with ground-measured data

for a minimum of fifteen (15) locations in Canada. This model must have been independently evaluated by NRCan or similar third party.

- The satellite solar resource model that the supplier has access to must include a multi-channel infrared module that improves performance during snow cover conditions.
- The satellite solar resource model that the supplier has access to must have been independently evaluated with ground-measured data from a minimum of ten (10) locations in North America with an average hourly mean bias error of less than 30 W/m² for both global and direct beam radiation.
- This satellite solar resource model must have been evaluated with ground-measured data from a minimum of five (5) locations in North America under snow conditions with an average hourly mean bias error of less than 20% for global horizontal radiation.
- Must have a minimum of five (5) years of experience in commercially producing independently quality-evaluated hourly or sub-hourly global and direct normal solar irradiance using satellite based data.

4. Trade Agreements:

This procurement is subject to the following trade agreement(s):

North America Free Trade Agreement (NAFTA);
Canadian Free Trade Agreement (CFTA)

5. Set-aside under the Procurement Strategy for Aboriginal Business:

Not applicable

6. Comprehensive Land Claims Agreement(s):

Not applicable

7. Justification for the Pre-Identified Supplier

We intend to deal directly with the supplier mentioned in section 13 below as it is the only known supplier that meets the mandatory criteria set out in section 3 above.

Should Canada receive a statement of capabilities from a supplier that contains sufficient information to indicate that it meets the requirements set forth in this

ACAN, a competitive process will be triggered with a technical and financial evaluation methodology of the bids proposed by the potential bidders

8. Exception to the Government Contracts Regulations

The following exception(s) to the Government Contracts Regulations is invoked for this procurement under subsection

- 6(d) – “only one person is capable of performing the work”

The identified provider, Clean Power Research, is the only one able to meet all of the criteria identified in paragraph 3 above.

9. Exclusions and/or Limited Tendering Reasons

The following exclusion(s) and/or limited tendering reasons are invoked under the:

North American Free Trade Agreement (NAFTA): Article 1016, 2, b

Canadian Free Trade Agreement (CFTA): Article 513 (b)

10. Ownership of Intellectual Property

Canada intends to retain ownership of any Foreground Intellectual Property arising out of the proposed contract.

11. Contract Period

The contract period will be from date of award to March 31, 2018

12. Estimated Cost

The estimated maximum value of the contract is \$80,000.00 USD inclusive.

13. Name and Address of the Proposed Contractor

Clean Power Research, LLC
10604 NE 38th Place, Suite 100
Kirkland, WA 98033 USA

14. Suppliers' right to submit a statement of capabilities

Suppliers who consider themselves fully qualified and available to provide the services/goods described herein, may submit a Statement of Capabilities in writing, preferably by e-mail, to the contact person identified in this Notice on or before the closing date and time of this Notice. The Statement of Capabilities must clearly demonstrate how the supplier meets the advertised requirements.

15. Closing Date

The closing date for a submission of a Statement of Capabilities is November 10, 2017 at 14:00 Eastern Standard Time).

16. Contract Authority

Julia Pace
1 Challenger Drive
Dartmouth, NS B2Y 4A2
