AMENDMENT TO THE RFSO

This RFSO amendment is issued to:

- respond to questions received from Bidders (see Log # 3 found attached).

BIDDER QUESTIONS (Log # 3)

RCMP LASER RFSO - Solicitation No. M7594-17-3091/A - RFSO Activity Log (Log # 3)							
Q #	RFSO Reference A			Resp.	Bidder Question B	Response C	RFSO Amendment D
	Part (1 to 7)	Article	Annex/Appendix				
3			Annex D, Appendix 1 (5.3, Control Functions)	RCMP	The question and answer will be provided in a future amendment.		
4			Annex D, Appendix 2, (Power Source)	RCMP	Could you please clarify "continuous operation"? We think that it refers to a typical 8-hour shift of continually using the LASER <u>and not</u> holding the trigger down for 8 hours which is not a typical use, as identified in the OEM's Operator Manual.	correct, normal operation for 8 hours, not actual run time of 8 hours.	
5			Annex D, Appendix 2, (Power Source - Weight of Batteries)	RCMP	The RFSO already provides for the weight of the LASER unit, including batteries, in the Mandatory Specifications. It appears that someone with a lighter total weight could be penalized for having a heavier battery or set of batteries. Would RCMP consider having points awarded for the number of batteries?	No, it's the total weight of the device that is a concern for the RCMP regardless of the weight of the individual batteries.	
6			Annex D, Appendix 2, (General Features - Physical Dimensions)	RCMP	It seems the "W" width allowance does not move proportionately along with the Length and Height. As the physical dimensions and ergonomic layout of the device can assist the Operator in better acquiring targets, reducing user fatigue, stability, and balance; awarding the maximum amount of points to the smallest LASER unit does not necessarily offer the best form, fit and function, as Users are of all different physical sizes. Would you consider Point-Rating this requirement instead?	The RCMP has decided to not change their requirement.
