This Amendment #003 is being issued to address the following questions received from potential bidders:

Q1. Are there available floor plans of the respective buildings that could be shared?

A1. Yes, included with this amendment.

Q2. Is the cabling required to provide Wi-Fi an Internet access to be provided by DND or is the provider responsible for this?

A2. The provider will be responsible for all aspects of the installation including hardware and/or wiring. There should be very little cable required.

Q3. Are the individual buildings interconnected?

A3. The building themselves are not connected, but all buildings are connected to building 202.

Q4. Can the Wi-Fi/Internet be separated from the cable TV requirement?

A4. No.

Q5. What is the physical address of the Base Communications Building on Ad Astra Way?

A5. 202 Ad Astra Way.

Q6. Are there any restrictions for a communication provider to bring fibre facilities to the Base Communications Building on Ad Astra Way?

A6. Yes. The conduit coming onto the Base is very full with very limited space available.

Q7. Can we obtain physical floor plans for each buildings we are to provide service into?

A7. Yes, included with this amendment.

Q8. For clarity, should the Wi-Fi service run on a base supplied Internet services or on the Wi-Fi service providers own internet service as a part of the blended solution?

A8. No it will not run on a Base supplied service. The contractor will need to provide the service.

Q9. Can the base provide a single pair of single-mode fibre between the Main Communications Building on Ad Astra Way (or the HQ Building) to each of the service locations? Or are there any restrictions on the Provider running fibre from the Main Communications Building on Ad Astra Way (or the HQ Building) to reach each service location?

A9. There is no single-mode available, but there is multi-mode available.

Q10. Are there any restrictions on mounting communication and network equipment on poles or buildings around the base or at the Base Communications Building on Ad Astra Way (i.e. satellite dish to deliver Cable fed TV services)?

A10. There are minimal restrictions that would require pre-approval from RP Ops.

Q11. In the residences that were not yet renovated with updated cabling infrastructure, is there a time frame as to when those upgrades would be completed?

A11. No.

Q12. In the residences that were not yet renovated with updated cabling infrastructure, is there an expectation that all services will be provided in those areas equally to the renovated areas or a delayed service deployment until the renovations are completed?

A12. The non-renovated units will require the same services.

Q13. Are there any restrictions on reasonably needed mounting space in the Base Communications Building on Ad Astra Way or the HQ Building?

A13. There is limited space available. We would just need to know how much space was needed.

Q14. In regards to the communication panel in each laundry room of the buildings, are there any special requirements in getting access to power to install active equipment in those panels by base personal?

A14. There shouldn't be any issues, but as in question 10, we would get prior approval from RP Ops.

Q15. For pricing clarity, all vendors are to submit 1 lump sum price for consideration, that will be paid evenly over a 60 month period using "Lump Sum Provided" divided by "60 Month" equals monthly payment? Or can the pricing be provided in a lump sum figure for evaluation, but include "Up Front Installation Fee = \$XX.XX" and "Monthly Recurring Fees for All Services = \$XX.XX/Month"?

A15. The lump sum installation fee is a separate line item under item #1 in the Basis of Payment at Annex B and the monthly rate is under item #2 as a monthly rate for both Wi-Fi and Cable Services combined. Item #1 will be paid upon inspection and acceptance after installation is complete and Item #2 will be paid on a monthly basis for services incurred. Evaluation of total cost will be based on the lowest priced compliant bid by multiplying the estimated quantity x the Unit of Issue x the firm unit price for each item and adding these 2 items together to reach a total combined cost for evaluation purposes.

Q16. 7.5 on page 13 of the RFP (Annex "A") states a requirement to turn Wi-Fi connections to the locations on/off as required. Does the base require this to be self-managed by the base team, with administrative access to enable and disable areas, users, restrict bandwidth, etc.. ?

A16. Yes, this will be managed by Accommodations staff with administrative access.

Q17. Are there requirements for authentication protocols for the Wi-Fi Service to prevent outside users from accessing the systems? Will there be a list of authorized users that we can authenticate against using Radius or some other type of service?

A17. Yes, there is a requirement for authentication protocols as well as a list of authorized users.

Q18. Is it the intent to provide service over the existing infrastructure or will a new network be constructed to service each location? If so, is it conceivable the new network could be delivered through existing conduit and manholes originating at Building 202?

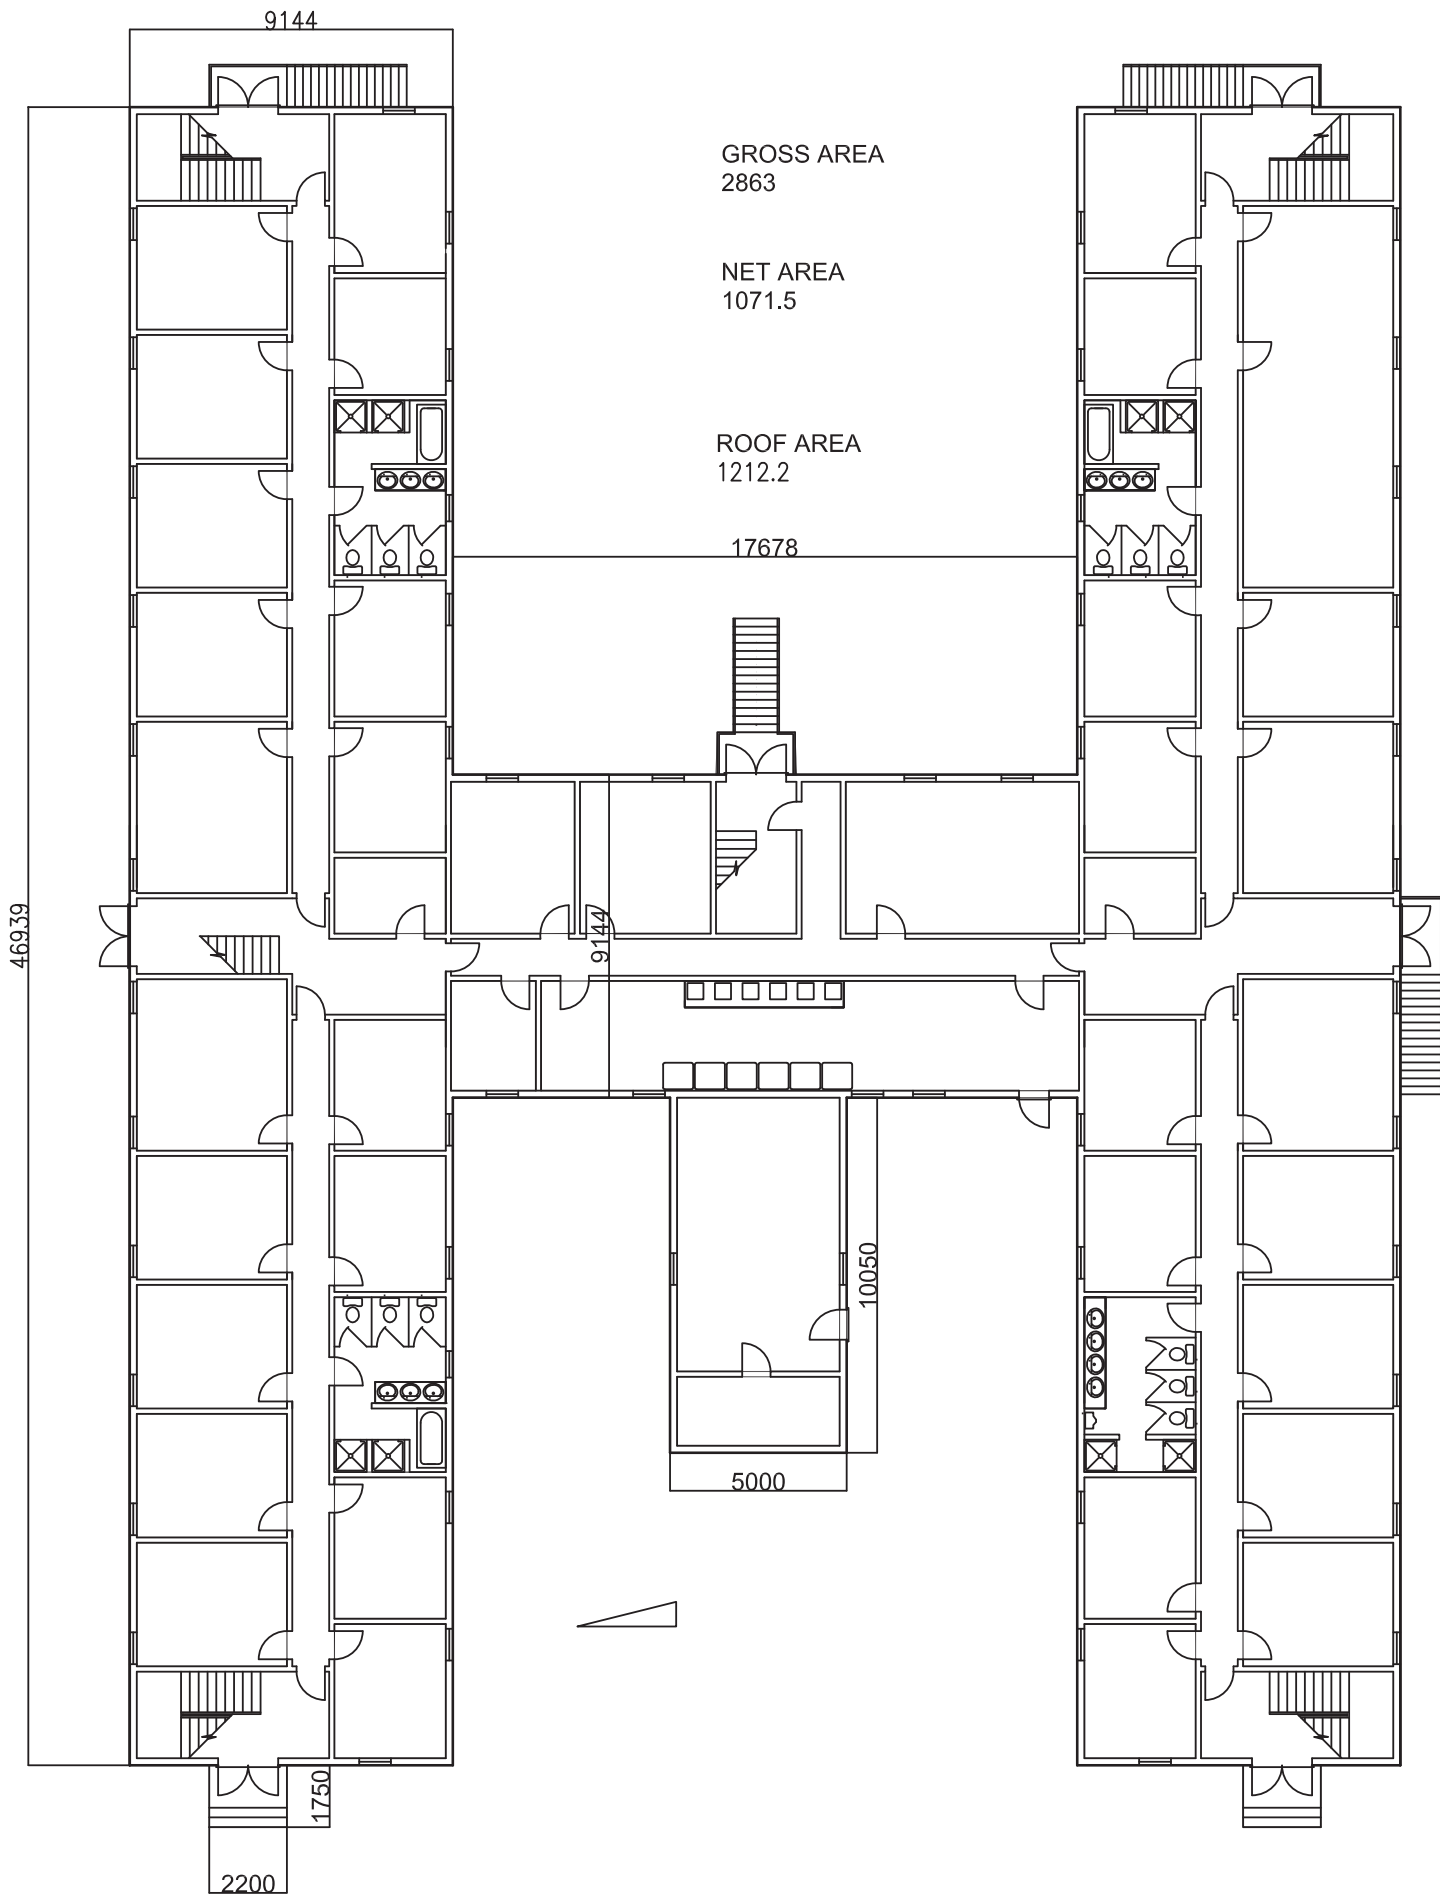

A18. Current infrastructure can be used (cabling), but there is limited space available in existing conduit.

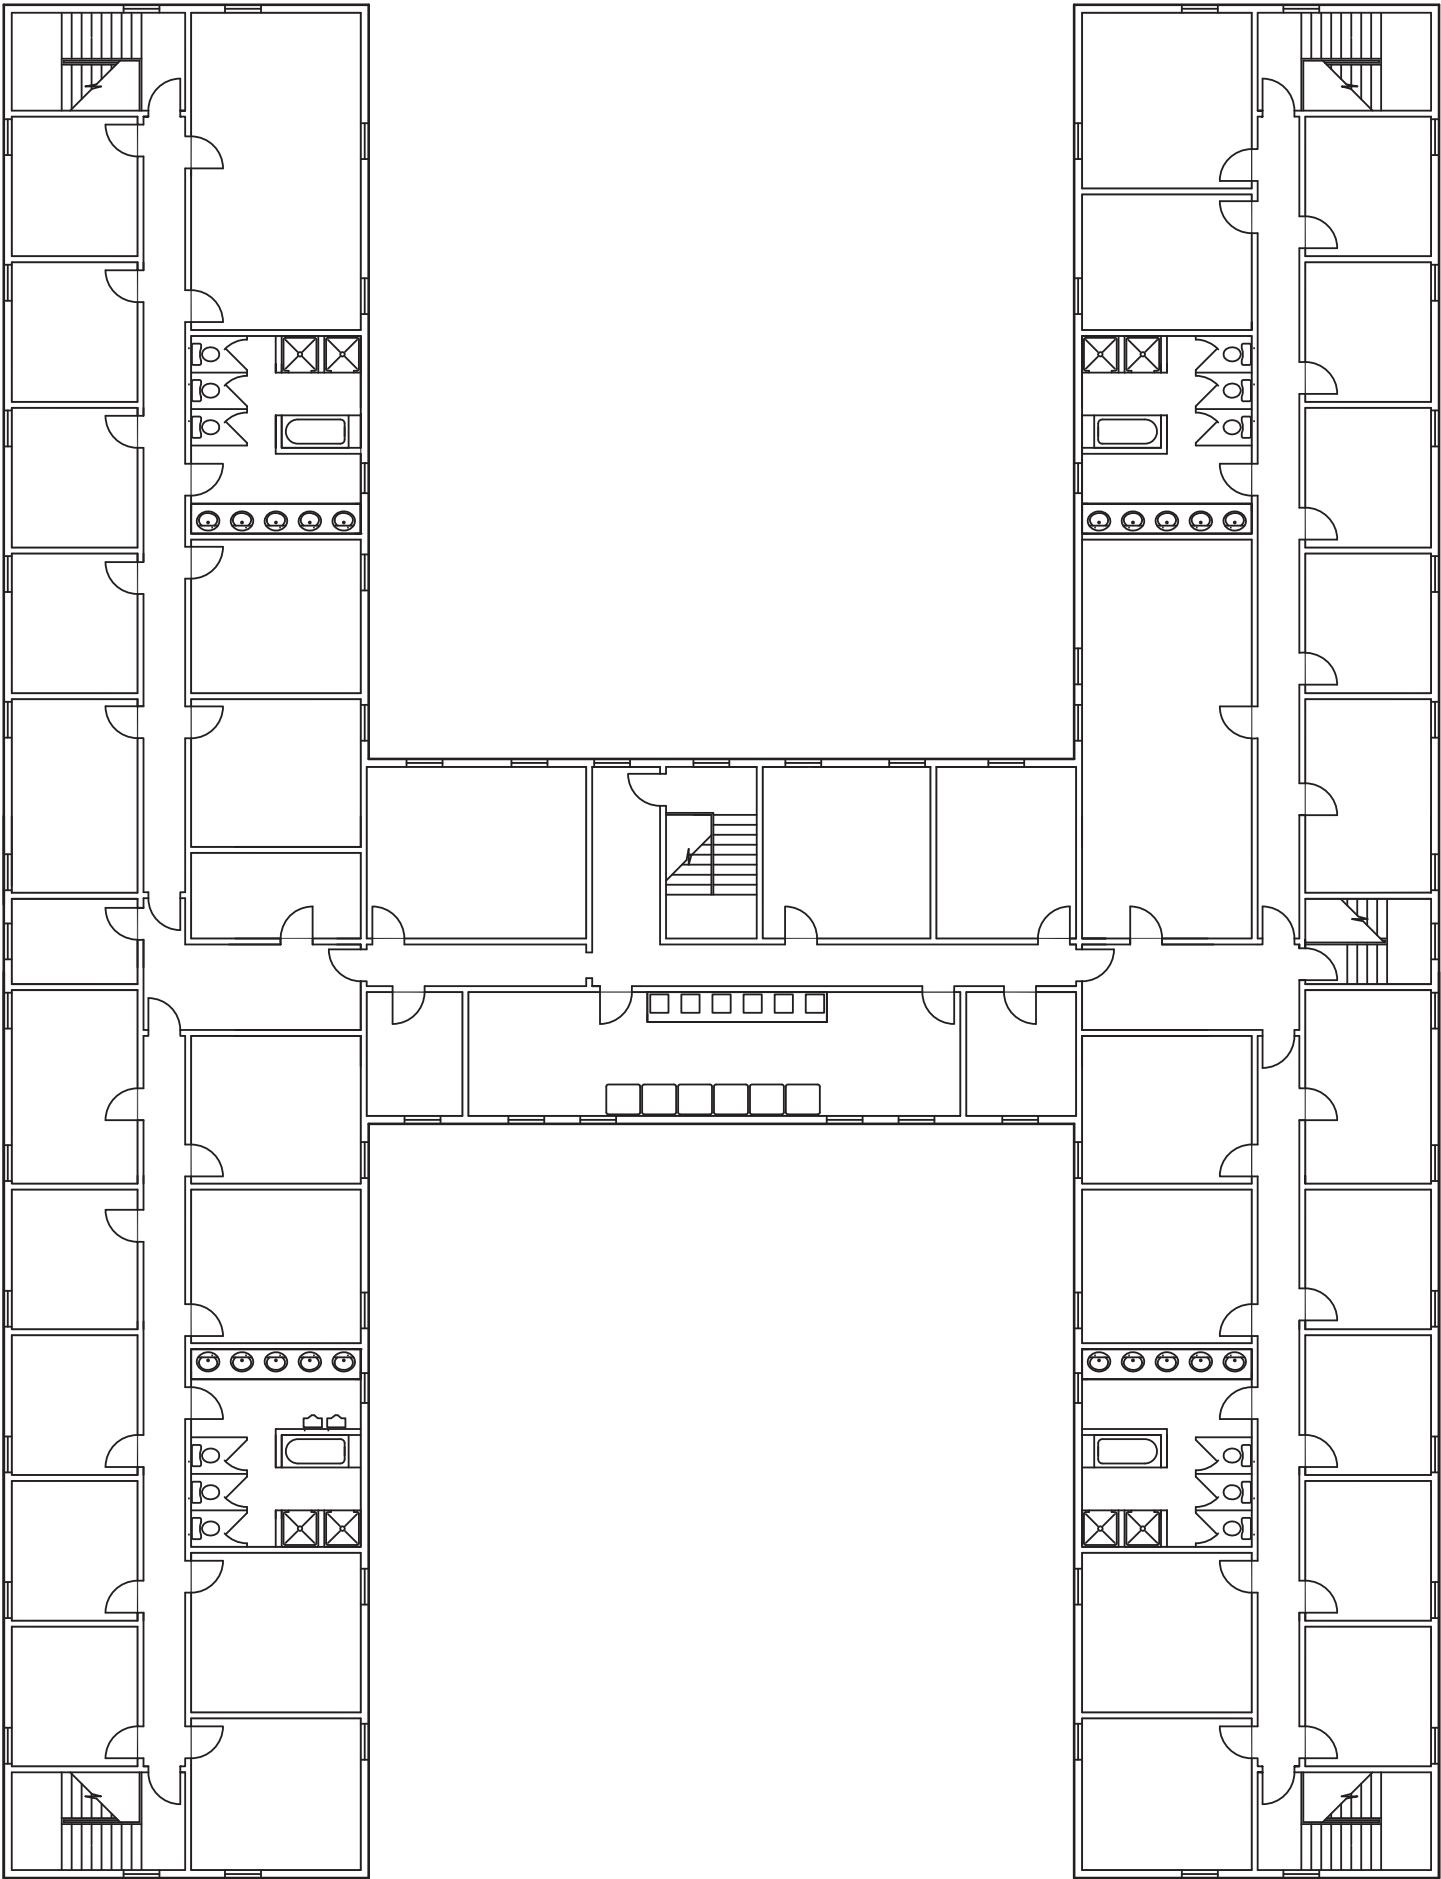

All other terms and conditions remain the same.
