Delete: Method and strategies used to complete the project highlighting project similarity to the Required Service outlined in Annex A, B3.

Insert: Method and strategies used to complete the project highlighting project similarity to the Required Service outlined in Annex A, A3 Required Services.

Under SPECIAL INSTRUCTIONS TO OFFERORS (SI)

Insert:

SI13 JOINT VENTURE

1. A joint venture is an association of two or more parties who combine their money, property, knowledge, expertise or other resources in a single joint Working enterprise, sometimes referred as a consortium, in order to submit together a bid. Bidders who submit a bid, as a joint venture must indicate clearly that it is a joint venture and provide the following information:
 - a. the name of each member of the joint venture;
 - b. the Procurement Business Number of the joint venture;
 - c. the name of the representative of the joint venture, i.e. the member chosen by the other members to act on their behalf, if applicable;
 - d. the name of the joint venture, if applicable.
2. If the information is not clearly provided in the bid, the Bidder must provide the information on request from the Contracting Authority.
3. The bid must be signed by all the members of the joint venture unless one member has been appointed to act on behalf of all members of the joint venture. The Contracting Authority may, at any time, require each member of the joint venture to confirm that the representative has been appointed with full authority to act as its representative for the purposes of the bid solicitation and any resulting contract.
4. All of the members of the joint venture are jointly and severally responsible for the obligations entered into by the Bidder in accordance with the Contract Documents.

Questions and Answers

Q5. Could you please provide further details to the personnel position of "Senior Technician", outlined in R3 – Point Related Technical Criteria. Is this the same as a Site Supervisor, or are you looking for something different here?

R5. No, the Senior Technician is not the same as a Site Supervisor. A Senior Technician is expected to direct remedial and risk management activities including but not limited too; collection and submission of samples, understand Quality Assurance (QA) and Quality Control (QC) regarding laboratory analysis and field testing, understanding project goals, manage on-site technical administration (sampling requirements, transportation requirement for contaminated soils and water, etc.) and work closely with the project manager and PSPC project manager to accomplish the technical environmental project objectives. That said, the Senior Technician may be required to perform site supervision if requested by the Departmental Representative. As detailed in Annex D, R3, the employees including the Senior Technician should have expertise in fields of remediation involving the use of in situ or ex situ treatment methods, green or sustainable remediation and remediation using an excavation, pumping and disposal method.

Q6. Can you let me know if the RFP for ENVIRONMENTAL REMEDIATION SERVICES FOR ONTARIO REGION is for consultant services or contractor services.

R6. Designs (e.g. Specifications and Drawings) for the implementation of Remediation/Risk management services will be developed by an independent Consultant engaged **separately** from this solicitation process. This RFSO is for Offerors to perform the actual implementation of Remediation/Risk Management Services as outlined in Annex A, Statement of Work, of the RFSO.

Q7. For this RFSO, does the supplier need to be able to offer everything listed in the services or could they offer one component of the services requested?

For example, the select list is:

"The range of services will include but are not limited to: carrying out projects involving the remediation of contaminated sites related to the issues of contaminated water (underground or surface), contaminated soils and sediments or residual materials, designated substances and hazardous waste, and off-site disposal including labour, material, transportation, travel and equipment necessary to carry out the Remediation in an environmentally sound manner."

Could someone apply for just the technology part of the remediation or could someone apply if they only supply the equipment...and so forth?

R7. As set out in Standing Offer Particulars 01 (SOP01), by submitting an offer, the Offeror offers to provide and deliver to Canada all of the services described in Annex A, and the Offeror must demonstrate that they can meet all the requirements of the Request for Standing Offers in accordance with the instructions contained in the bid solicitation including the technical and financial criteria at time of offer closing.

Depending on the site-specific considerations and environmental issues at hand (as defined and provided at the time of call-up), Contractors must perform all or part of the following services identified in Annex A, A.3 Required Services.

ALL OTHER TERMS AND CONDITIONS OF THE STANDING OFFER REMAIN UNCHANGED
