## Portable Furnace

Natural Resources Canada – CanmetMATERIALS (CMAT) requires a portable reheating box furnace with the capability to operate using an inert internal atmosphere to minimize oxidation during the reheating process. This new piece of equipment will allow for more efficient hot rolling of smaller billets and finish rolling of transfer plates. It will also be useful in hot rolling processes done on the 50T STANAT laboratory rolling mill and in standalone heat treatment/quenching operations. The combined equipment capabilities will offer flexibility and reliability so that CMAT can deliver a variety of services to clients.
