---

Solicitation Amendment 001 is being issued to respond to questions received on solicitation No. K3D33-180515/A.

**Question 1:** our question is regarding the data loggers or remote terminal units receiving the data or the outputs from the would be supplied atmospheric pressure sensors. We would appreciate it if you may provide us with information about the data loggers Makes, Models, types, their power output to excite the sensors (specifications if possible).

**Response1:** We will be using the proposed pressure sensor with a variety of data loggers – no single make, model, or type.

The power output specifications to excite the proposed sensor are specified in annex A, section 6.3, items 9 (Power Requirement, Voltage range), 10 (Power Requirement – Current Consumption), 11 (Inverse polarity protection) and 12 (Extreme power protection).

These specifications assure us of compatibility with all of our current and planned data loggers, and other sensors currently in use or planned on those data loggers. The proposed pressure sensor is only one of several sensors connected to this equipment, and only a portion of the data logger's total power output is available for the pressure sensor.

**ALL OTHER TERMS AND CONDITIONS REMAIN THE SAME AND IN FULL EFFECT**
