## **AMENDMENT 002**

This amendment is being raised to answer the following questions.

**Q1: In the project brief the total budget for the project is listed as \$900,000. Can you provide the following clarifications?**

A1: Our budget is an order of Magnitude based on price/m2.

**Q2: The estimated cost of the Radon remediation, and is it included in the total budget?**

A2: No estimate completed. Included in \$/m2 price.

**Q3: The estimated cost of the Asbestos remediation, and is it included in the total budget?**

A3: No estimate completed. Included in \$/m2 price.

**Q4: Is a complete Building Condition Assessment, to PWGSC standards or VFA standard required as part of RS 1.1? What is the date of the last BCA of this building?**

A4: There have been no BCA's completed. A building Condition Assessment should be completed in RS1 to determine the full scope of work of repair vs replacement and enhancements.

**Q5: The proposal response asks for detailed information on the architectural, electrical and mechanical team members, yet the project brief identifies full services to include cost estimating and interior design. Is interior design services required for RS 1.3 and RS1.4 only?**

A5: Only the Architectural, Electrical and Mechanical team will be evaluated. If the A,M&E team have sufficient experience then an Interior Designer and Cost Estimator are optional for this project.

**Q6: Civil and Structural engineering services are listed as "potentially" in the project brief? Are Civil and structural reviews required for the Building Condition Assessment in RS 1.1? Yes, Civil and Structural should be a part of the review for RS1.1 and they should provide services for potential design changes. Will these profession services be considered additional to the contract, and provided only if needed in RS 1.3 and RS 1.4 if the preferred design solution requires it?**

A6: If major Structural and or Civil work becomes a part of the renovation then this additional work will be considered an extra to the contract. An hourly rate for structural and Civil engineering work is to be included in the proposal to aid in determining the value of the extra work.
