**Operational Clothing and Footwear Consolidated Contract (OCFC2)
Request for Information (RFI) on the Value Proposition (VP) supplier development
requirements**

1. Preface

Canada is seeking feedback from industry with respect to the Value Proposition (VP) supplier development requirements for apparel and footwear to be included in the upcoming OCFC2 Request for Proposal (RFP).

2. Objective of the RFI

Previous industry engagements which were undertaken in November 2015, June 2016 and January 2017 have supported the development of the current VP framework. The objective of this consultation is to obtain additional feedback from industry on the VP supplier development requirements; specifically the minimum mandatory Canadian content requirements for apparel and footwear. Industry is invited to provide comments and suggestions on the minimum mandatory Canadian content levels and to answer the question posed by Canada. Feedback from industry will be used to enhance the Government of Canada's current knowledge base and finalize the requirements for the forthcoming OCFC2 RFP. The following document supersedes the VP supplier development minimum mandatory Canadian content requirements included in Annex E that was released as part of the previous draft RFP engagement in January 2017.

3. Background

The Defence Renewal initiative announced in October 2013 re-confirmed the commitment of the Department of National Defence (DND) to find efficiencies in its business processes and offer the potential for improvements in materiel and inventory management without the need for DND to develop these capabilities in house. OCFC2 builds on the existing Consolidated Clothing Contract (C3) model operating for DND to acquire the dress and occupational / environment uniform commodities, offering assurance of a tried and proven business model which has evolved through the last 20 years. For all items stipulated under contract, a prime vendor will be responsible for their acquisition, as well as inventory and distribution management and other services. This managed clothing solution (MCS) provides the opportunity to develop a direct delivery system between the contractor and individual military members for some items managed under the contract. Canada expects that the OCFC2 will allow for lower contract management and administrative overhead, lower inventory, improved acquisition cycles, improved response times for corrective actions and product improvement while allowing the apparel, textile and footwear industries to remain competitive, innovative and responsive.

4. Nature and Format of Responses Requested

(a) Respondents are requested to provide answers and comments to the question attached to this introduction letter, raise any concerns and/or make recommendations on the VP supplier development requirements. Respondents are also requested to explain any assumptions made in their responses.

- (b) Any additional comments can be submitted separately from the question.
- (c) Responses should include the name of the respondent firm and the contact person.

5. Nature of Request for Information (RFI)

- (a) This RFI is an industry consultation document intended to solicit feedback from industry with respect to the matters described in this RFI. This is not a bid solicitation.
- (b) This RFI will not result in the award of any contract, nor will this RFI result in the creation of any source list, therefore, whether or not any potential supplier responds to this RFI will not preclude that supplier from participating in any future procurement. Also, the procurement of any of the goods and services described in this RFI will not necessarily follow this RFI. This RFI is not considered as an authorization by Public Services and Procurement Canada (PSPC) to undertake any work that would result in costs to Canada.

6. Response Costs

The Government of Canada assumes no responsibility or obligation with respect to the cost of preparing a response to this RFI. Canada will not reimburse any respondent for expenses incurred in responding to this RFI.

7. Treatment of Responses

(a) Use of Responses:

- i. Responses will not be formally evaluated. However, the responses received may be used by Canada to modify procurement strategies or any draft documents related to this RFI. Canada will review all responses received by the RFI closing date. The Government of Canada may, at its discretion, review responses received after the RFI closing date.
- ii. Canada reserves the right to hire any independent consultant, or use any Government resources, which it deems necessary to review any response.
- iii. Written responses will become the property of Canada and will not be returned. Canada may use, reproduce or translate, in whole or in part, in any material form, the responses.

(b) Confidentiality:

- i. Respondents should mark any portions of their response that they consider proprietary and confidential. Respondents must show why the information is confidential. Canada will treat the information as confidential, to the extent permitted by the Access to Information Act, if Canada agrees with the confidential nature of the information.

(c) Follow-up Activity:

- i. Canada may, in its discretion, contact any respondents to follow up with additional questions or for clarification of any aspect of a response.

8. Official Languages

Responses to this RFI may be in either of the official languages of Canada.

9. Content of this RFI

Respondents should not assume that requirements will be / not be added to any bid solicitations that are ultimately published by Canada. Nor should respondents assume that any of the clauses or requirements will be deleted or revised.

10. Drawings and technical specifications available upon request

To assist industry in answering the question attached to this introduction letter, Canada will provide upon request on a USB key, a copy of the drawings and technical specifications for the items included on Master Item List which are available at this time. Requests for a USB key with the drawings and technical specifications must be submitted by email to the Contracting Authority, preferably before the closing date of the RFI.

11. Enquiries

(a) All enquiries and communications with Canada regarding this RFI must be directed to the Contracting Authority, preferably on or before the closing date of the RFI, by email to the Contracting Authority at: Robert.Picco@tpsgc-pwgsc.gc.ca

(b) Because this is not a bid solicitation, Canada will not necessarily respond to all enquiries.

12. Submission of Responses – Closing Date

Please submit your written response to this RFI by email to the Contracting Authority at: Robert.Picco@tpsgc-pwgsc.gc.ca by December 15, 2017.

13. Fairness Monitor

(a) Respondents are advised that Canada will utilize the services of a Fairness Monitor throughout the OCFC2 procurement process.

(b) Fairness Monitor services are being provided by Knowles Consultancy Services Inc.

Operational Clothing and Footwear Consolidated Contract

Request for Information
on Value Proposition
Supplier Development
requirements

November 2017

Purpose of Request for Information

- The purpose of this request for information is to obtain additional feedback from industry stakeholders on the Value Proposition supplier development requirements; specifically the minimum mandatory Canadian content requirements for apparel and footwear.
- Industry is invited to provide comments and suggestions on the minimum mandatory Canadian content levels and to answer the question posed by Canada.
- Feedback from industry will be used to enhance the Government of Canada's current knowledge base and finalize the requirements for the forthcoming Operational Clothing and Footwear Consolidated Contract (OCFC2) Request for Proposals.

Background

- The Industrial and Technological Benefits policy including Value Proposition will apply to the Operational Clothing and Footwear Consolidated Contract (OCFC2) initiative.
- The Government of Canada recognizes that the application of the Industrial and Technological Benefits policy represents a significant change for industry stakeholders.
- To address industry's questions about how to calculate Canadian Content Value as per the Industrial and Technological Benefits policy, a Letter of Interest was published on Buyandsell in May 2017: <https://buyandsell.gc.ca/procurement-data/tender-notice/PW-PR-756-72856>

Background (continued)

- Canada has undertaken additional analysis and has carefully considered feedback from all industry stakeholders with respect to the supplier development component of the OCFC2 Value Proposition.
- Based on analysis and industry feedback, Canada has made modifications to the Value Proposition supplier development requirements.
- These changes are intended to ensure that the approach for leveraging economic benefits from the OCFC2 initiative balances the need for sufficient flexibility over the life of the contract with mandatory minimum Canadian content levels that are achievable for Canadian industry.

Value Proposition Supplier Development: Previous Approach

- Canadian Content Value – Industrial and Technological Benefits method of calculation of Canadian Content in a product.
- Supply chain participation was motivated through mandatory minimums in each of the 5 groupings.
- 5 Groupings breakdown:
 - CADPAT Apparel (minimum 85%) = 2 VP points
 - Non-CADPAT Apparel (minimum 85%) = 3 VP points
 - Badges and Insignia (minimum 90%) = 1 VP point
 - Footwear (minimum 75%) = 3 VP points
 - Soldiers Personnel Equipment (minimum 70%) = 1 VP point
- A maximum of 10 VP Points were allocated for commitments made above the minimum threshold.
- Commitments were pro-rated in the VP Evaluation.
- Commitments were to be met on a yearly basis.

Value Proposition Supplier Development: Revised Approach

Elements that are unchanged:

- Canadian Content Value – Industrial and Technological Benefits policy method of Canadian Content Value calculation.
- Supply chain participation will be motivated through mandatory minimums in each of the 5 groupings.
- A maximum of 10 VP Points will be allocated for commitments made above the minimum threshold.
- The Contractor will be required to submit annual reports on its performance regarding Canadian Content Value. This data will be tracked and monitored by Canada.

Value Proposition Supplier Development: Revised Approach

Elements that have been revised:

Minimum Canadian content values to be achieved for each Groupings have been changed and the VP point distribution slightly adjusted to focus on Groupings where there is greatest impact for Canadian industry:

5 Groupings breakdown:

- CADPAT Apparel (minimum 75%) = 3 VP points
- Non-CADPAT Apparel (minimum 60%) = 3 VP points
- Badges and Insignia (minimum 75%) = 0.5 VP points
- Footwear (minimum 60%) = 3 VP points
- Soldiers Personnel Equipment (minimum 50%) = 0.5 VP points

Value Proposition Supplier Development: Revised Approach

Elements that have been revised (continued):

At bid time:

- Commitments will be based on an average over five (5) years to allow for fluctuations in annual orders while ensuring that Canadian companies are involved in the production of these products.
- For the VP Evaluation, Commitments will be scored using relative scoring. Points will be awarded for committing above the mandatory minimums in 1 percent increments up to a maximum of 90 percent.
 - Example scoring: For a Grouping with 3 VP points available, if the mandatory minimum was 60 percent, the bidder would receive 0.10 VP points for every percentage committed above the mandatory minimum. Thus, if the bidder committed to 70 percent, the formula of $10\% \times 0.10$ would result in the bidder receiving 1 VP point (out of a possible 3).

Question

1. To support the apparel, textile, and footwear industrial sectors in Canada, mandatory minimum levels of Canadian content have been established, which will be measured using the definition of Canadian Content Value included in the Industrial and Technological Benefits Terms and Conditions of the Request for Proposals. What are your views on the following minimum Canadian content levels for each grouping?
 - a. Group 1 – CADPAT Apparel: minimum 75%
 - b. Group 2 – Non-CADPAT Apparel: minimum 60%
 - c. Group 3 – Badges and Insignia: minimum 75%
 - d. Group 4 – Footwear: minimum 60%
 - e. Group 5 – Soldiers Personnel Equipment: minimum 50%

Next Steps

- Written feedback on the economic leveraging question is to be submitted to the PSPC Contracting Authority and is requested by December 15, 2017.
- Information provided to the Government of Canada will be considered in the development of the economic leveraging approach for this procurement.
