SOLICITATION AMENDMENT 002

THE FOLLOWING AMENDMENT TO THE BID DOCUMENTS IS EFFECTIVE IMMEDIATELY. THE
AMENDMENT SHALL FORM A PART OF THE RESULTING CONTRACT DOCUMENTS.

EXTENSION OF TIME:

Bids previously scheduled to close on Thursday, November 23, 2017 at 2:00 pm NST will now close on Thursday, November 30, 2017 at 2:00 pm NST.

QUESTIONS AND ANSWERS:

Q1. Reference requirement 3.8 – The proposed crane will include a weld-down pedestal that will include stiffeners and gussets that will properly distribute the load on the existing foundation without modification. Is there an ideal pedestal height that is desired based on the location? Minimum pedestal height is 750 mm.

A1. No, there is no ideal pedestal height.

Q2. Reference requirement 4.3 – Would having the power unit as a separate, self-contained, skid mounted unit that can be mounted near the crane or below deck be acceptable?

A2. No, there is no space available nearby.

Q3. Can Canada please clarify requirement 5.5? Would a top level drawing be sufficient to satisfy this requirement or is Canada expecting a full technical data package which contains intellectual property for each bidder?

A3. CCG requires the basic crane data package from the manufacturer noting performance, technical, and dimensional data. As well, engineered stamped drawings would need to be Classification Society approved for the items not part of the crane supply, i.e. foundation, underdeck stiffening, etc.

Q4. Referencing Q3 and A3 from Clarifications Supplied, Item 2.3a. - It was not verified if the current foundation is rated to 185kNm, which we assume that it must be as that is the load rating of the current crane. Can this be verified?

A4. The current foundation load rating cannot be verified. Contractor shall provide new foundation or modify as per 2.3.a or shall be responsible to confirm acceptable as per 2.3.b.

Q5. Referencing Q5 and A5 from Clarifications Supplied, Item 2.3b. - We have consulted with Naval Architect and classification society and the information on drawing 2925-01-00 is not sufficient to assess the existing deck foundation for approval. Are there other ship drawings available showing the structure to which the deck foundation is attached in order for Naval Architect and classification society to assess for suitability or changes?

A5. There are no additional drawings. Contractor shall provide new foundation or modify as per 2.3.a or shall be responsible to confirm acceptable as per 2.3.b.

Q6. Referencing Q6 and A6 from Clarifications Supplied: We would like to verify that the drawing provided "201 SeaCrane Podium contains the referenced HPU and that the mounting pattern shown 1 1/6", TYP – 20 places is matched by a bolt pattern on the mounting plate shown on drawing 2925-01-00.

A6. That is correct.

Q7. With reference to "Statement of Requirement" Part 2: General Requirements, 2.3 a) Question... Can the existing base be used & adaptor plate supplied for crane other than Hiab.

A7. Yes. However, the supplier would be responsible for the engineered stamped drawings approved by a Classification Society.

All other terms and conditions remain unchanged.
