

QUESTION AND ANSWER

Q1. The metal flashing(See specification, section 07 62 00, page 2 , Part2 –Products , Item 2.1) and Pre-formed Metal siding (See specification , section 07 46 19, page 1, Part2 – Products, Item 2.1 material) you want which are 1mm thick Aluminum Sheet? It is very thick, it is very hard to prefabricate and also the material is very expensive, 4 times more expensive than 24 gauge galvanized metal sheet. It is big difference for pricing.

A1. Metal flashing and siding to be carried in the bid are as described in the specifications.
