La modification à la demande de soumission no 001 vise à apporter les changements ci-dessous.

A) Répondre aux questions dans le cadre et découlant de la visite obligatoire des lieux, qui s'est déroulée le jeudi 23 novembre 2017 à 10 h HNE.

B) Modifier l'annexe A – Énoncé des travaux

C) Modifier l'annexe B – Base de paiement

D) Ajouter l'annexe D – Garantie du toit

A) Q et R sur la visite obligatoire des lieux

Liste des participants :

1. AB Project Management and Construction Inc.
2. Canadian Burner and Boiler Systems
3. GAL Power Systems
4. TPL Installations Inc.

Q1 : Y a-t-il un numéro d'identification sur le réservoir journalier?

R1 : Le réservoir journalier ne porte aucun numéro d'identification.

Q2 : Qui alimente l'ASPC en carburant?

R2 : Le fournisseur de carburant est Boucher and Jones.

Q3 : Le toit est-il neuf et actuellement sous garantie?

R3 : Oui, le toit a environ un an et demi et est toujours sous garantie. Les travaux sur le toit devront être effectués par l'entreprise de toitures pour nous assurer que la garantie demeure valide. Une copie de la garantie pour la toiture et les coordonnées des personnes-ressources de l'entreprise de toitures sont jointes à la présente modification à la demande de soumission.

Q4 : À quel endroit une grue peut-elle être utilisée/installée sans difficulté sur les lieux?

R4 : La grue peut être installée sur le quai de chargement/déchargement.

Q5 : Un système de surveillance est-il relié au groupe électrogène diesel?

R5 : Oui, un système de surveillance est relié par l'automatisation des bâtiments de Johnson Controls.

Q6 : Le support pour transformateur sera-t-il déplacé par l'ASPC avant que les travaux soient effectués?

R6 : Oui, il sera réduit ou complètement enlevé pour ne pas constituer un obstacle.

Q7 : Des dessins techniques doivent-ils être présentés?

R7 : Aucun dessin n'est nécessaire.

Q8 : Le système ou les lieux sont-ils surveillés par un système d'automatisation des bâtiments? Devons-nous toucher au système ou pouvons-nous ne pas nous en occuper?

R8 : Non. L'entrepreneur doit fournir le contact sec seulement. Le branchement sera fait par des tiers.

Q9 : Devons-nous établir une alimentation de secours étant donné qu'il s'agit d'un laboratoire d'agents pathogènes?

R9 : L'ASPC gérera la question de l'électricité à l'interne. Aucune génératrice de réserve n'est nécessaire.

Q10 : Quel est le calendrier pour attribuer le contrat et terminer tous les livrables?

N° de l'invitation – Sollicitation No.
EQ481-180950/A
N° de réf. du client – Client Ref. No.
EQ481-180950

N° de la modif – Amd. No.
001
N° du dossier – File No.
TOR-7-40084

Id de l'acheteur – Buyer ID
tor015
N° CCC/CCC No. – N° VME/FMS No.

R10 : Conformément à la date de livraison spécifiée dans la DP, tous les travaux doivent être terminés d'ici le 31 mars 2018. Le contrat devrait être attribué au cours de la première moitié de janvier 2018.

B) Modifier l'annexe A – Énoncé des travaux, Section 5 – Critère d'acceptation de l'installation

Insérer :

(b) L'entrepreneur doit obtenir et fournir à l'ASPC une copie à jour et valide du rapport d'inspection du distributeur de carburant (FODIR) de la TSSA à la fin des travaux avant l'inspection finale et l'acceptation par l'ASPC des travaux effectués.

(c) L'entrepreneur doit obtenir et fournir à l'ASPC une copie à jour et valide du rapport d'inspection de la TSSA requis à la fin des travaux.

C) Modifier l'annexe C – Base de paiement

Supprimer dans son intégralité.

Insérer :

ANNEXE B

BASE DE PAIEMENT

Prix de lot fermes tout compris en dollars canadiens, fourniture, installation et transport inclus, FAB destination indiqué et frais de livraison compris. Les droits de douane et les taxes d'accise canadiens sont en sus. La TPS/TVH est en sus s'il y a lieu et doit être indiquée à un endroit distinct sur les factures.

1.1 Mise à niveau du système d'alimentation en carburant pour génératrice

No d'article	Description	Quantité	Prix de lot ferme
1	Fourniture, livraison et installation complète de la mise à niveau du système d'alimentation en carburant pour génératrice appartenant au laboratoire de l'Agence de la santé publique de Guelph (Ontario), et exploité par celui-ci, conformément aux spécifications décrites à l'annexe A, Énoncé des travaux.	1 lot	_____ \$CAN
2	Copie à jour et valide du rapport d'inspection du distributeur de carburant (FODIR) de la TSSA à la fin des travaux avant l'inspection finale et l'acceptation par l'ASPC des travaux effectués, tel que le précise l'annexe A, Énoncé des travaux	1 lot	_____ \$CAN

№ 10048

Two Year Labour Warranty

Description of Warranty: Rooftops & Sheetmetal Corp warrants that all material has been installed according to manufactures instruction. In the event of a leak, Rooftops & Sheetmetal Corp will only provide labour to fix the leak. Cost of material is the responsibility of the manufacturer or the building owner.

Period of Warranty: May 30th 2016 to May 29th 2018

Terms and Conditions: Owners to inform Rooftops & Sheetmetal Corp. as soon as possible in the event a leak occurs.

Rooftops & Sheetmetal Corp. is not responsible for damages from:

1. Work done by others
2. Severe or Unusual Weather
3. Vandalism

This labour warranty shall be null and void if any alterations, additions, or repairs are made without first contacting Rooftops & Sheetmetal Corp.

This warranty shall be null and void if any payment was not paid off.

INSTALLATION DATE

METHOD OF CALCULATION FOR IKO'S LIABILITY

Membranes with a 10-year
Limited Material Warranty period:

IKO Protection Period = 3 years
Cost reduction factor for first 72 months = $n/100$
Cost reduction factor for balance of warranty term = $n/172$

Membranes with a 12-year
Limited Material Warranty period:

IKO Protection Period = 3 years
Cost reduction factor for first 84 months = $n/120$
Cost reduction factor for balance of warranty term = $n/206$

SAMPLE CALCULATION

A manufacturing defect resulting in leaks is found in a Membrane constructed of Modiflex MF-95-SS base sheet and an MP-250-Cap sheet (a 12-year Limited Material Warranty Membrane) in October, 2008. The Membrane was installed in January, 2000. A total of 105 months have elapsed since installation. IKO's maximum material cost share would be reduced by $(84/120=0.70) + (21/206=0.10) = 0.80$, or 80%. Therefore, IKO's maximum liability would be 20% towards the replacement membrane material cost.

COMMERCIAL AND INDUSTRIAL ROOFING LIMITED MATERIAL WARRANTY

The terms and requirements of this Limited Material Warranty ("Warranty") apply to IKO Industries Limited ("IKO"), the Roofing Contractor ("the Roofing Contractor"), and the Building Owner ("the Owner").

IKO hereby warrants to the Owner of a building on which IKO products have been installed as a roof Membrane (hereinafter referred to as "the Membrane") that the Membrane will remain free of any manufacturing defect resulting in water leakage during the applicable warranty period, subject to the conditions and limitations listed below. This Warranty is applicable only to Membranes installed in Canada, or Membranes purchased from an approved IKO exporter. This limited warranty applies to product installed in accordance with IKO published specifications and application recommendations in effect at the time of roof application.

LIMITATION OF LIABILITY

During the first three years of the Warranty period, IKO shall pay the reasonable costs for the material required to replace the defective Membrane (exclusive of costs of metal flashings, metal work, ballast, or other materials supplied or manufactured by others) less any costs previously incurred by IKO for the replacement of the Membrane. After the first three years of the Warranty period, IKO's maximum liability is calculated as the original cost of the defective Membrane multiplied by the unexpired fraction of the Warranty period (See reverse for details and an example calculation.)

MODIFICATION OF WARRANTY

1. THIS WARRANTY REPLACES ALL OTHER ORAL OR WRITTEN WARRANTIES, LIABILITIES OR OBLIGATIONS OF IKO OF ANY NATURE WHATSOEVER. THERE ARE NO WARRANTIES WHICH EXTEND BEYOND THE DESCRIPTION IN THE FACE HEREOF. IKO WILL NOT BE LIABLE FOR ANY ORAL STATEMENT OR OTHER WRITTEN STATEMENT ABOUT THE MEMBRANE OR THE ROOF DESIGN, WHETHER SUCH STATEMENTS ARE MADE BY AN AGENT OR EMPLOYEE OF IKO OR BY ANY OTHER PERSON, OTHER THAN THE PRESIDENT OF IKO. IKO DOES NOT AUTHORIZE ITS REPRESENTATIVES, DISTRIBUTORS, CONTRACTORS OR DEALERS TO MAKE ANY CHANGES OR MODIFICATIONS TO THIS WARRANTY.

2. The provisions of this Warranty are in addition to and not a derogation from the statutory warranties, rights and remedies, if any, contained in any applicable consumer protection legislation.

NON-TRANSFERABILITY

This Warranty applies to the original Owner and is not transferable in any manner whatsoever.

OWNER RESPONSIBILITIES

1. To obtain performance under this Warranty, the Owner shall notify IKO in writing by certified mail within 30 days following the discovery of the warranted defect. Notification of claim shall be accompanied by a cheque payable to IKO Industries in the amount of Two Hundred dollars (\$200.00) to cover the cost of inspection. This amount will be refunded to the Building Owner in the event that IKO confirms that the leaks resulted directly due to manufacturing defects in the roofing system materials supplied by IKO. The owner shall provide free access to the area of the suspect IKO product for agents or employees of IKO to inspect the area, and to make whatever investigations or examinations they may consider appropriate. The Owner must provide proofs of purchase to substantiate the original date of the IKO Membrane installation. No action for breach of this Warranty shall be brought later than one (1) year after any cause of action has accrued.
2. The Owner must exercise reasonable care in maintaining the Membrane.
3. The Owner must prove that water leakage has resulted solely from the defectively manufactured Membrane and from no other cause.

CONDITIONS AND EXCLUSIONS

1. IKO will have no obligation under this Warranty until such time as IKO, the Roofing Contractor and Material Suppliers have been fully paid for all installation services, supplies and materials.
2. IKO's liability shall apply only to water leakage resulting solely from the defectively manufactured Membrane and from no other cause. Without limiting the generality of the foregoing, IKO shall have no liability for any damage resulting from:
 - a) workmanship or failure by the Roofing Contractor to install any or all of the Membranes in strict accordance with IKO specifications and application instructions in effect at time of installation, and approved building practices, or
 - b) structural defects, settlement, distortion, cracking, or failure of substrate or the roofing base over which the Membrane is applied, or inadequate performance of products not manufactured or sold by IKO, or (NOTE: Membranes must not be torched to combustible substrates)
 - c) any damage if the roof is altered after initial installation of the roofing system, whether any such alteration is by structural additions, changes, or replacement or equipment installations (including without limitations, aerials, signs, water towers, fan housings, air conditioning equipment, television antennas and skylights) except where a written request has been sent to IKO in advance of such alterations, and such alterations are performed by an approved contractor, and IKO provides written permission for such alterations, or
 - d) unusual traffic, or from use as a storage area or recreational surface or for any other purpose for which it was not designed, or
 - e) any change in the use of the building or a change in the technology associated with the processes carried on within the building from those for which it was originally designed, or
 - f) standing water; drainage must meet Canadian Roofing Contractors Association (CRCA) or National Roofing Contractors Association (NRCA) minimum recommendations, or
 - g) infiltration or condensation of moisture in, through or around walls, coping, building structure or underlayment or surrounding material, or
 - h) failure of the owner to exercise reasonable care in maintaining the Membrane, such as a maintenance program recommended by either the CRCA or NRCA, or
 - i) any damage caused by lightning, gale, hurricane, tornado, tempest, hailstorm, ice storm, earthquake, flood, fire, explosion, impact of foreign objects or from abuse or mistreatment of the Membrane, civil insurrection, war, riot, vandalism, or
 - j) chemical attack from any chemical materials including but not limited to greases, solvents, oils, or other chemicals.
 - k) On roof assemblies, including but not limited to inverted roof assemblies, costs for removal of equipment and all overburden are also excluded.
3. In furtherance of and not in limitation of the foregoing, IKO will have no liability under this warranty for: (a) any variation in color or shading of the Membrane; (b) any damage to the interior or exterior of any building or any property contained therein; (c) any costs incurred for repair or replacement not authorized in writing by IKO; (d) any damage caused by any cause other than a manufacturing defect; (e) any costs related to disposal; or (f) any costs related to the removal of any asbestos present in the roof to which the Membrane is installed.
4. In all cases, the replacement Membrane is warranted only for the remainder of the original Membrane Warranty.
5. IKO reserves the right to discontinue or modify any of its products, without notice to the Owner and shall not be liable to the Owner as a result of this modification or discontinuance. IKO will have no liability in the event that replacement material may vary in color in comparison to the original product as a result of product changes or normal weathering.
6. THIS WARRANTY DOES NOT INCLUDE ANY LIABILITY FOR INCIDENTAL OR CONSEQUENTIAL DAMAGES. Some provinces do not allow the exclusion or limitation of incidental or consequential damages, so the above limitations may not apply to you.
7. The unenforceability of any provision stated herein will not effect the enforceability of any other provision which will remain in full effect.
