This Solicitation Amendment No. one (1) is raised to include the following addendum no. 1.

The following addendum to the tender documents is effective immediately. This addendum shall form part of the contract documents.

All other terms and conditions remain the same.

Addendum No. 1.

## **1. QUESTIONS AND ANSWERS**

Q1. Is there a sand cell (or a cell of any type) that the excavated materials are supposed to go or will the excavated material be the property of the contractor and disposed of off site?

A1. The material to be excavated for the key at the bottom of the toe slope can be temporarily stored on-site then placed on top of the new armour stone embankment.

Q2. The dredge spoil material to be excavated for the key way of the amour stone, is this material to be incorporated into the filter stone or is it to be hauled away and were?

A2. See Answer 1.

Q3. Would PWGSC accept that sandstone is dump on the over the existing filter stone for an access road? Is there an area that can be used to dry the access road material once remove before hauled out?

A3. The idea was to add filter stone to the existing material on site, and then drive on this material. If you wish to add material to allow trucks to drive onto the filter stone you can add smaller material. We request that this material be a quarried material that can remain on site after the armour stone is in place. The finer material added to allow truck to drive on will be supplied and installed will not be paid separately but be considered incidental.
