Amendment 2

Concrete Loading Blocks

This amendment was raised to answer questions:

Question:

1. With respects to Page 12 – Section 5. Tasks, item (c) – Can you please qualify what needs to be covered under the 5 year warranty? The damage caused by impact should not be included.
2. Annex C - Drawing (9) welding is according to AWS. Does Canadian Welding Bureau certification qualify or will supplier have to be AWS certified?
3. What are the tolerances for mass and dimension for the concrete loading blocks? The dimension of the block is in the specification but it only has the maximum size for the blocks. Can the supplier determine the block size ourselves?
4. Is it possible that we could produce a solid steel weight plate instead of reinforced concrete?

Answer:

1. The warranty we would like would cover environmental degradation repairs and the associated transportation cost to and from the site for the repairs.
2. The Canadian Welding Bureau Certification is acceptable also.
3. Yes the supplier can determine the size themselves as long as the overall weight is to specifications.
4. No

All other terms and conditions of this Request For Proposal remain unchanged.
