---

**Amendment 005 – UPS Battery, is being raised for the following reason:**

- 1. Provide a response back from Public Works and Government Services Canada to questions received from bidders.**
- 

**Q1.** The cabinet has 104 batteries, and we are to supply 80 batteries, which ones do they want us to replace? My business experience with UPSs tells me it is a really bad idea to replace just some of the batteries as it is next to impossible to test the capacity of batteries. What I mean is, I can test the battery and it may show the right voltage and appear to be good, but may have little or no capacity so the job could be done and fail the next day, week or month. If they still want to go ahead we either need to know which batteries of the 104 that need replacement or we should be told to test.

**A1.** Question 4 of the Q&A answers this question:

UPS Powerware 9355 30 KVA serial number BG192KXX02. 144 batteries at 120w each in the cabinets and 108 batteries at 34w in the main unit.

**ALL OTHER TERMS AND CONDITIONS OF THIS SOLICITATION REMAIN UNCHANGED.**

**If your tender has already been forwarded and you wish to revise same, this revision should be faxed and reach the bid receiving area before the closing date. The tender number and the closing date are to be shown on the first page of your fax.**
