ADDENDUM NO. 2

Subject: **Invitation to Tender No. FP802-170263**

Title: **Floating Dock Installation**

Location: **Fishing Harbour of Grande-Rivière – Gaspesia region, Qc**

Dear Sir/Madam:

Further to the above-mentioned Invitation to Tender, this **Addendum 02** is to advise potential bidders of the following modifications and/ or questions and answers received from bidders to this tender call:

QUESTIONS and ANSWERS

1. Question from Bidder:

Drawings ask for concrete bags for anchor blocks, can you give details of the requested materials? (Which type of cement is required?) Is it a mixture of sand-cement and how thick should it be?

DFO Answer 01:

Bags of sand-cement mixture sold in hardware stores or a dry mix of concrete brought to the construction site and placed in jute bags or others is an acceptable work method. This method of intervention is used instead of a geotextile with a granular foundation to avoid scouring and provide a flat and stable base. For this reason, there is no specified thickness.

2. Question from Bidder:

Can you specify where the stone to be excavated and stored for future work should be stored?

DFO Answer 02:

In the service area behind the wharf, where floating docks are stored

3. Question from Bidder:

Can you specify where are the floating docks supplied by DFO to be installed at Grande-Rivière harbour? Does DFO provide loading of floating docks on the contractor's transportation?

DFO Answer 03:

The floating docks are stored in the service area behind the wharf.

4. Question from Bidder:

Is it possible to have more details on the concrete bags under the bases.

DFO Answer 04:

See question #1

5. Question from Bidder:

Also, do you plan to postpone the closing date for this tender?

DFO Answer 05:

No

All other terms and conditions remain unchanged.

Yours truly,

Lynda Coulombe
