This Model Bid Solicitation contains samples of the terms that will form the basis for any future requests for proposals (RFPs) for Natural Resources Canada (NRCan).

To the extent possible, these Articles are written as they will appear in any future RFP(s). However, individual RFPs and the Resulting Contract Clauses may be modified to suit individual requirements. For example, the nature of the requirement, the term of the resulting Contract, the evaluation methodology and the basis of payment clauses may all be tailored to individual requirements.

The Articles in the Resulting Contract Clauses are mandatory in their entirety, unless otherwise indicated. Acceptance of these Articles, in their entirety, as they appear in this Annex, is a Mandatory requirement of this RFP. Suppliers submitting an Offer containing statements implying that their Offer is conditional on modification of these clauses or containing terms and conditions that purport to supersede these clauses or derogate from them will be considered non-responsive.

Offerors with concerns regarding the provisions of the Model Bid Solicitation (including the Resulting Contract Clauses) should raise such concerns in accordance with the Enquiries provision of this RFP.

This bid solicitation cancels and supersedes previous bid solicitation number NRCan-5000033817 dated 06 October 2017 with a closing of 14 November 2017 at 14:00. An email will be sent to bidders/offerors/suppliers who bid on the previous solicitation.

The only change to the previous solicitation is Mandatory Evaluation Criteria M10 with additional clarification (page 42 of the document).

Care should be taken by Bidders to explain each question in sufficient detail in order to enable Canada to provide an accurate answer. Technical enquiries that are of a proprietary nature must be clearly marked "proprietary" at each relevant item. Items identified as "proprietary" will be treated as such except where Canada determines that the enquiry is not of a proprietary nature. Canada may edit the question(s) or may request that the Bidder do so, so that the proprietary nature of the question(s) is eliminated and the enquiry can be answered to all Bidders. Enquiries not submitted in a form that can be distributed to all Bidders may not be answered by Canada.

Canada requests that Bidders follow the format instructions described below in the preparation of their bid:

(a) use 8.5 x 11 inch (216 mm x 279 mm) format;

(b) use a numbering system that corresponds to the bid solicitation.

If there is a discrepancy between the wording of the soft copy and the hard copy, the wording of the hard copy will have priority over the wording of the soft copy.

In April 2006, Canada issued a policy directing federal departments and agencies to take the necessary steps to incorporate environmental considerations into the procurement process <u>Policy on Green</u> <u>Procurement</u> (http://www.tpsgc-pwgsc.gc.ca/ecologisation-greening/achats-procurement/politique-policy-eng.html). To assist Canada in reaching its objectives, Bidders should:

Section I: Technical Bid

In their technical bid, Bidders should demonstrate their understanding of the requirements contained in the bid solicitation and explain how they will meet these requirements. Bidders should demonstrate their capability in a thorough, concise and clear manner for carrying out the work.

The technical bid should address clearly and in sufficient depth the points that are subject to the evaluation criteria against which the bid will be evaluated. Simply repeating the statement contained in the bid solicitation is not sufficient. In order to facilitate the evaluation of the bid, Canada requests that Bidders address and present topics in the order of the evaluation criteria under the same headings. To avoid duplication, Bidders may refer to different sections of their bids by identifying the specific paragraph and page number where the subject topic has already been addressed.

Bidders must submit their financial bid in accordance with the **Financial Proposal Form in Appendix** "**II**". The total amount of Applicable Taxes must be shown separately.

Section III: Certifications

4.1.1 Technical Evaluation

The Contracting Authority will have the right to ask for additional information to verify the Bidder's certifications. ANNEX "A" - STATEMENT OF WORK For Task Authorization Security Services

1.0 Background

In 1995, the *Department of Natural Resources Act* called for the amalgamation of the Energy, Mines and Resources with Forestry Canada, thus creating Natural Resources Canada (NRCan). Regardless of the name change, the department can trace its roots back more than 150 years, as one of the Government of Canada's oldest organizations. Today, NRCan is one of the largest science-based organizations in the Government of Canada, specializing in the sustainable development and use of natural resources — energy, minerals and metals, forests and earth sciences.

NRCan's raison d'être is to improve the quality of life of Canadians by helping to create a sustainable resource advantage. The department's aim is to position Canada as a global leader in clean energy and sustainable resource development. Underpinning this objective is the premise that access to natural resources, and the sustainable ways in which they are produced and used, has emerged as a core source of competitive advantage among nations.

To fulfill its mandate, NRCan conducts activities in areas of core federal jurisdiction that fall within its legislated roles and responsibilities, working toward outcomes supportive of economic competitiveness, environmental responsibility, the safety and security of Canadians and the stewardship of natural resources.
